TRANSPORTATION DIVISION

Dayton P. Jorgenson, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1972 Census of Transportation. Primary direction of the program was performed by **Shirley Kallek**, Associate Director for Economic Fields, and **Melvin A. Hendry**, Assistant Director for Economic Censuses.

This report was prepared in the Transportation Division under the general direction of **Dayton P. Jorgenson**, Chief, and **Walter F. Buhl**, Assistant Chief. Within this division responsibility was shared by the following individuals who contributed significantly to the entire program: **Jerome Litzky**, Chief, Survey Programs Branch; **Donald G. Wright**, Chief, Research Programs Branch; **Evelyn S. Davis**, publications specialist; and **Helen L. Buckley**, clerical supervisor. **Sylvia Leaver**, Data User Services Division, was responsible for the computer planning and programming. **Dorcus Dupree** coordinated the activities among Transportation Division, Data Preparation Division, and Computer Services Division.

Responsibility for data collection was in the Field Division under the direction of **Richard C. Burt**, Chief; **George T. Reiner**, Chief, Economic Coordination Branch; and **Dwight P. Dean** and **Thomas J. Manning**, Survey Statisticians.

The mailing, collecting of data, and processing of administrative record information were conducted by the Economic Surveys Division under the direction of **Roger Bugenhagen**, Chief. Assistance was provided by **Samuel Schweid**, **Andrew Grieco**, **Charles Venters**, **Shirley Roberts**, **Robert Viehman**, **Jerry McDonald**, **Joel Richardson**, and **Sandra Katis**.

Forms design was performed in the Administrative Services Division, **Henry J. Husmann**, Chief, **Gladys Potts**, **Joyce Teague**, **Helen Hindt**, and **Margaret Swinton** made significant contributions.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

Clerical and data keying operations were performed in the Data Preparation Division at Jeffersonville, Indiana, under the direction of **O. Bryant Benton**, Chief, who was assisted by **Don L. Adams** and **Robert L. Allen**.

The geographic coding procedures were developed in the Geography Division under the direction of **Jacob Silver**, Chief, assisted by **Zigmund Decker**, **Terence McDowell**, **Silla Tomasi**, **Robert Hamill**, **David Christy**, **Kurt LeGait**, and **John Hawkins**. Computer processing was directed by **James R. Pepal**, Chief, Computer Services Division. **C. Thomas DiNenna**, **Jesse Verdeja**, and **Willie E. Clark** provided staff assistance.

Donald Young of the Economic Census Staff participated in the overall planning and review of the census operations.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

The statistics presented in this volume incorporate the commodity, special, and area report series TC72C1, TC72C3, and TC72C2.

Area Report 8

United States Summary

See pages VI to X for descriptions of Production Areas.

PRODUCTION AREA DESCRIPTIONS

Production Areas represent relatively compact geographic concentrations of manufacturing activity. Twenty-five Production Areas were originally developed for this survey. Two additional areas were added in 1972 so that there are now 27. Each Production Area consists of one Standard Metropolitan Statistical Area (SMSA) or more. The SMSA's included in each Production Area are described below.

PRODUCTION AREA 1

BOSTON, MA

Essex County (part)
Beverly city

1,500 miles or more do	1.1	6.1	2.4	10.8

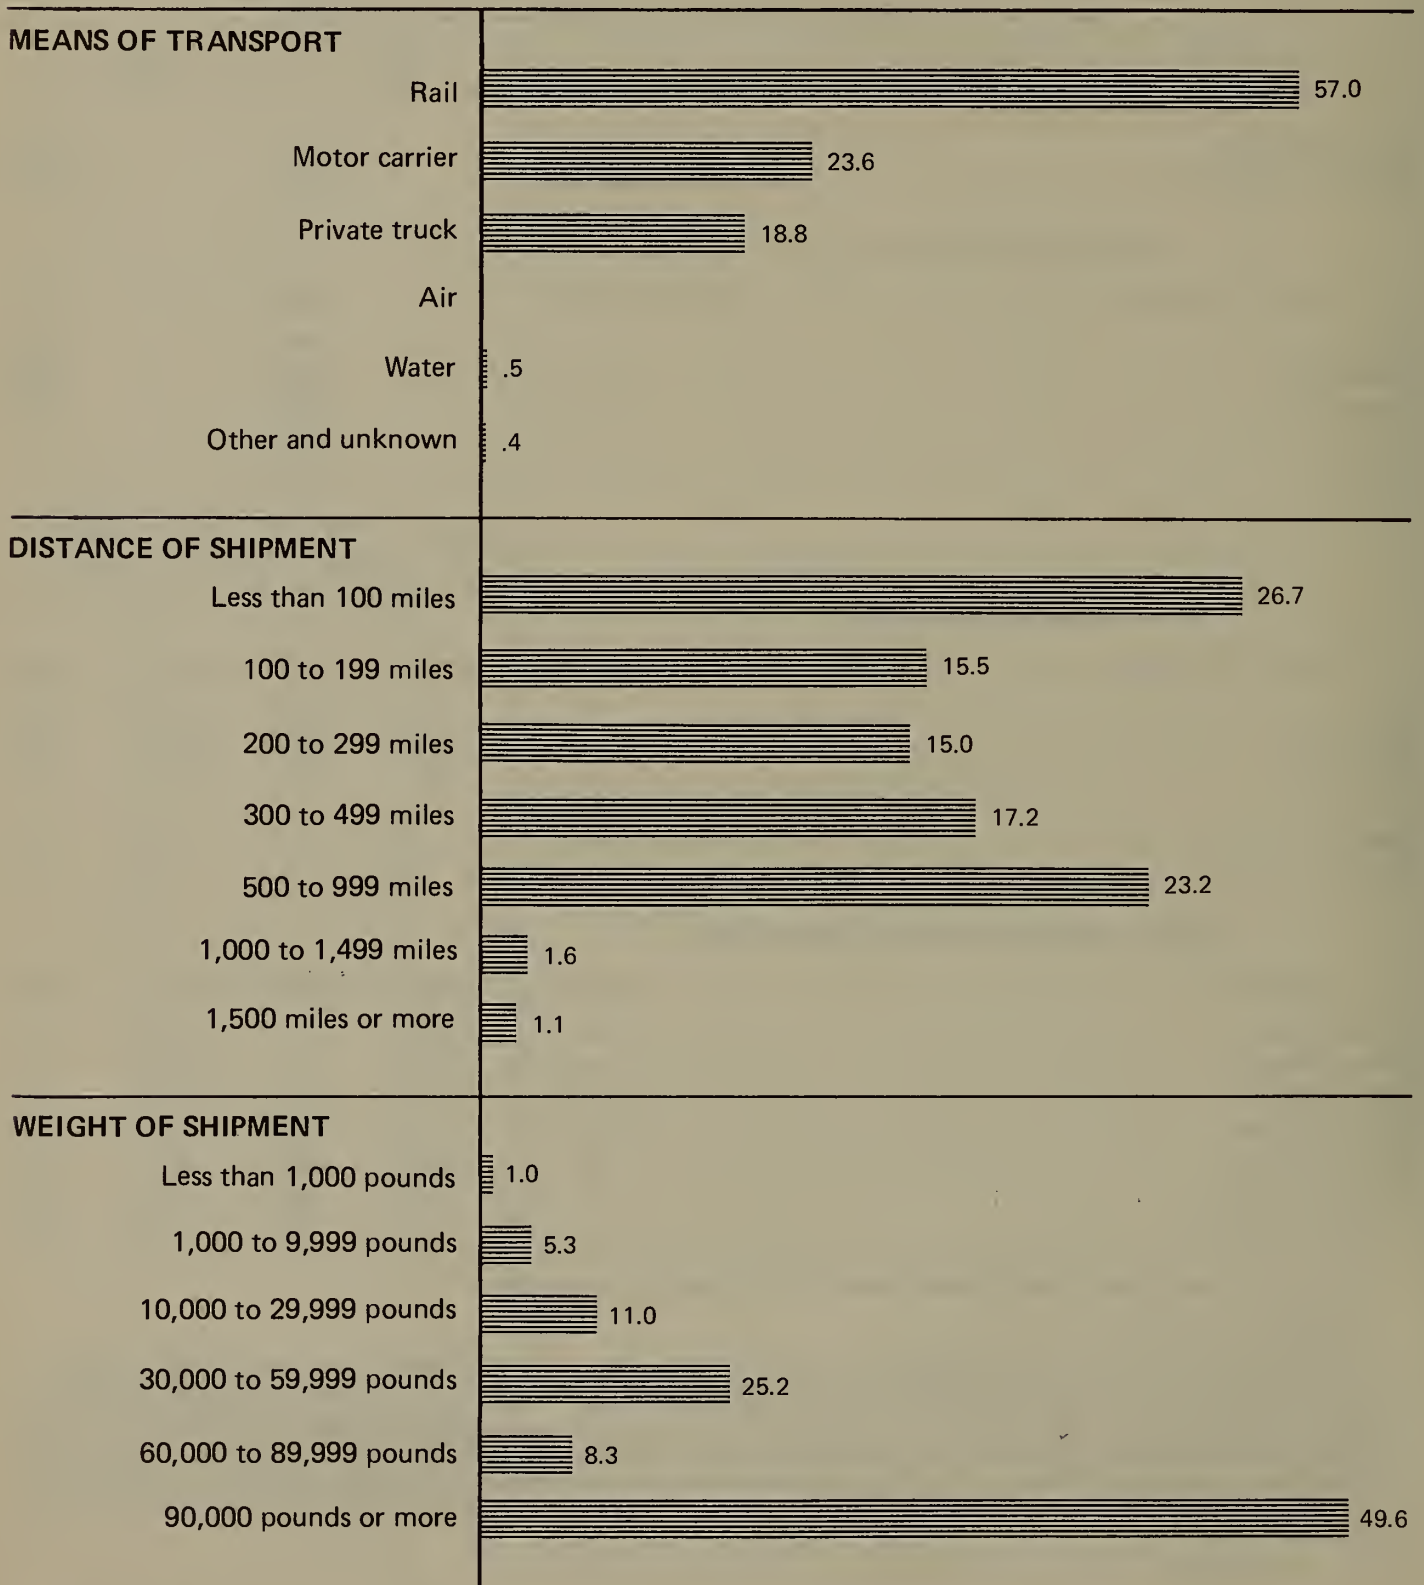

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Notes: Detail may not add to total due to rounding.

SIC 205 was out of scope to this 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

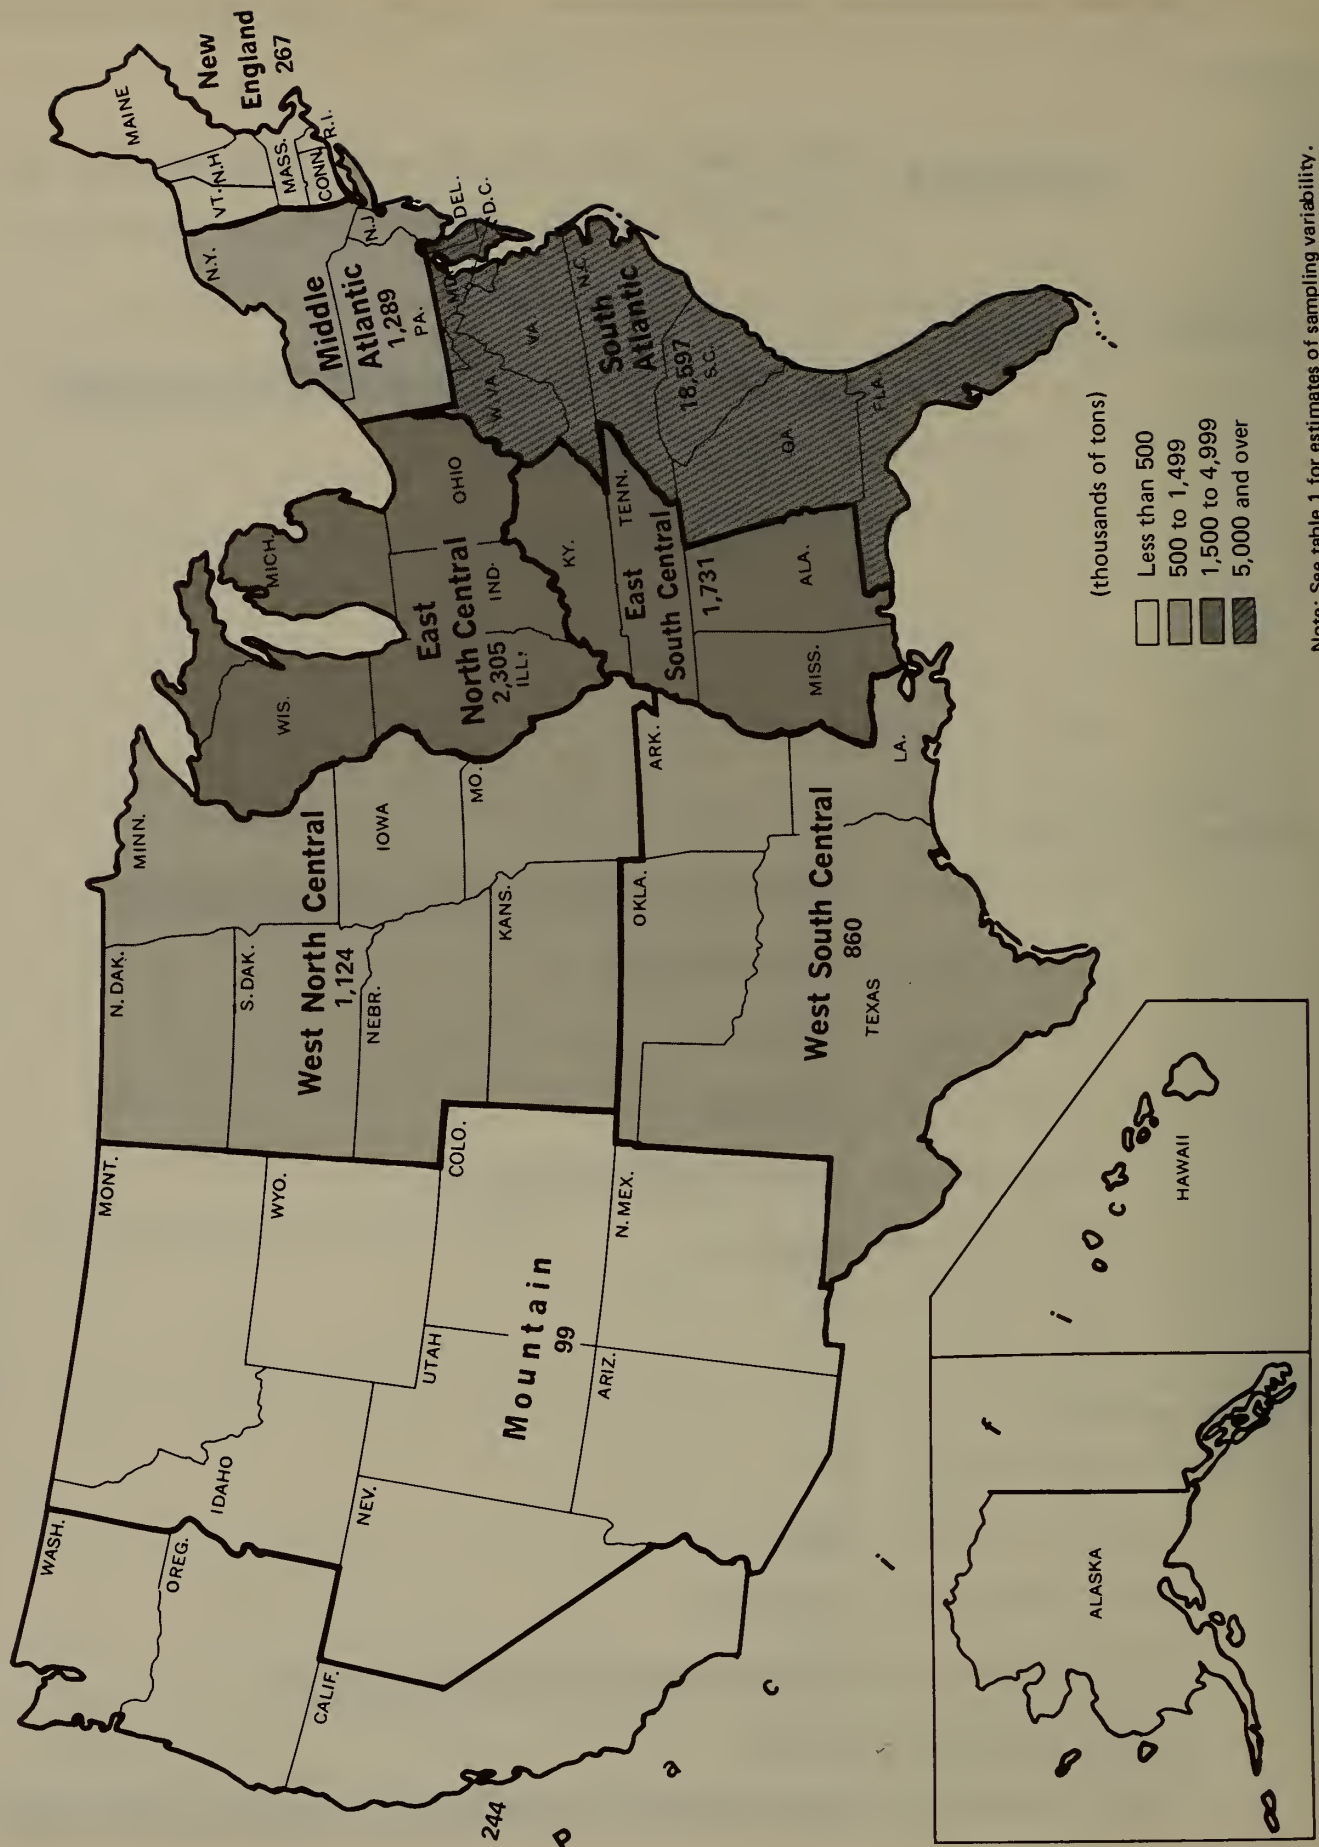

CHART 1.

FLORIDA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

FLORIDA | *Shipments, by Geographic Division of Destination: 1972* (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

TABLE 1. Percent Distribution of Commodities Shipped to Geographic Divisions, by Means of Transport: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

— Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

GEORGIA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Shipments, by Geographic Division of Destination: 1972
(Based on thousands of tons)

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

KENTUCKY | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

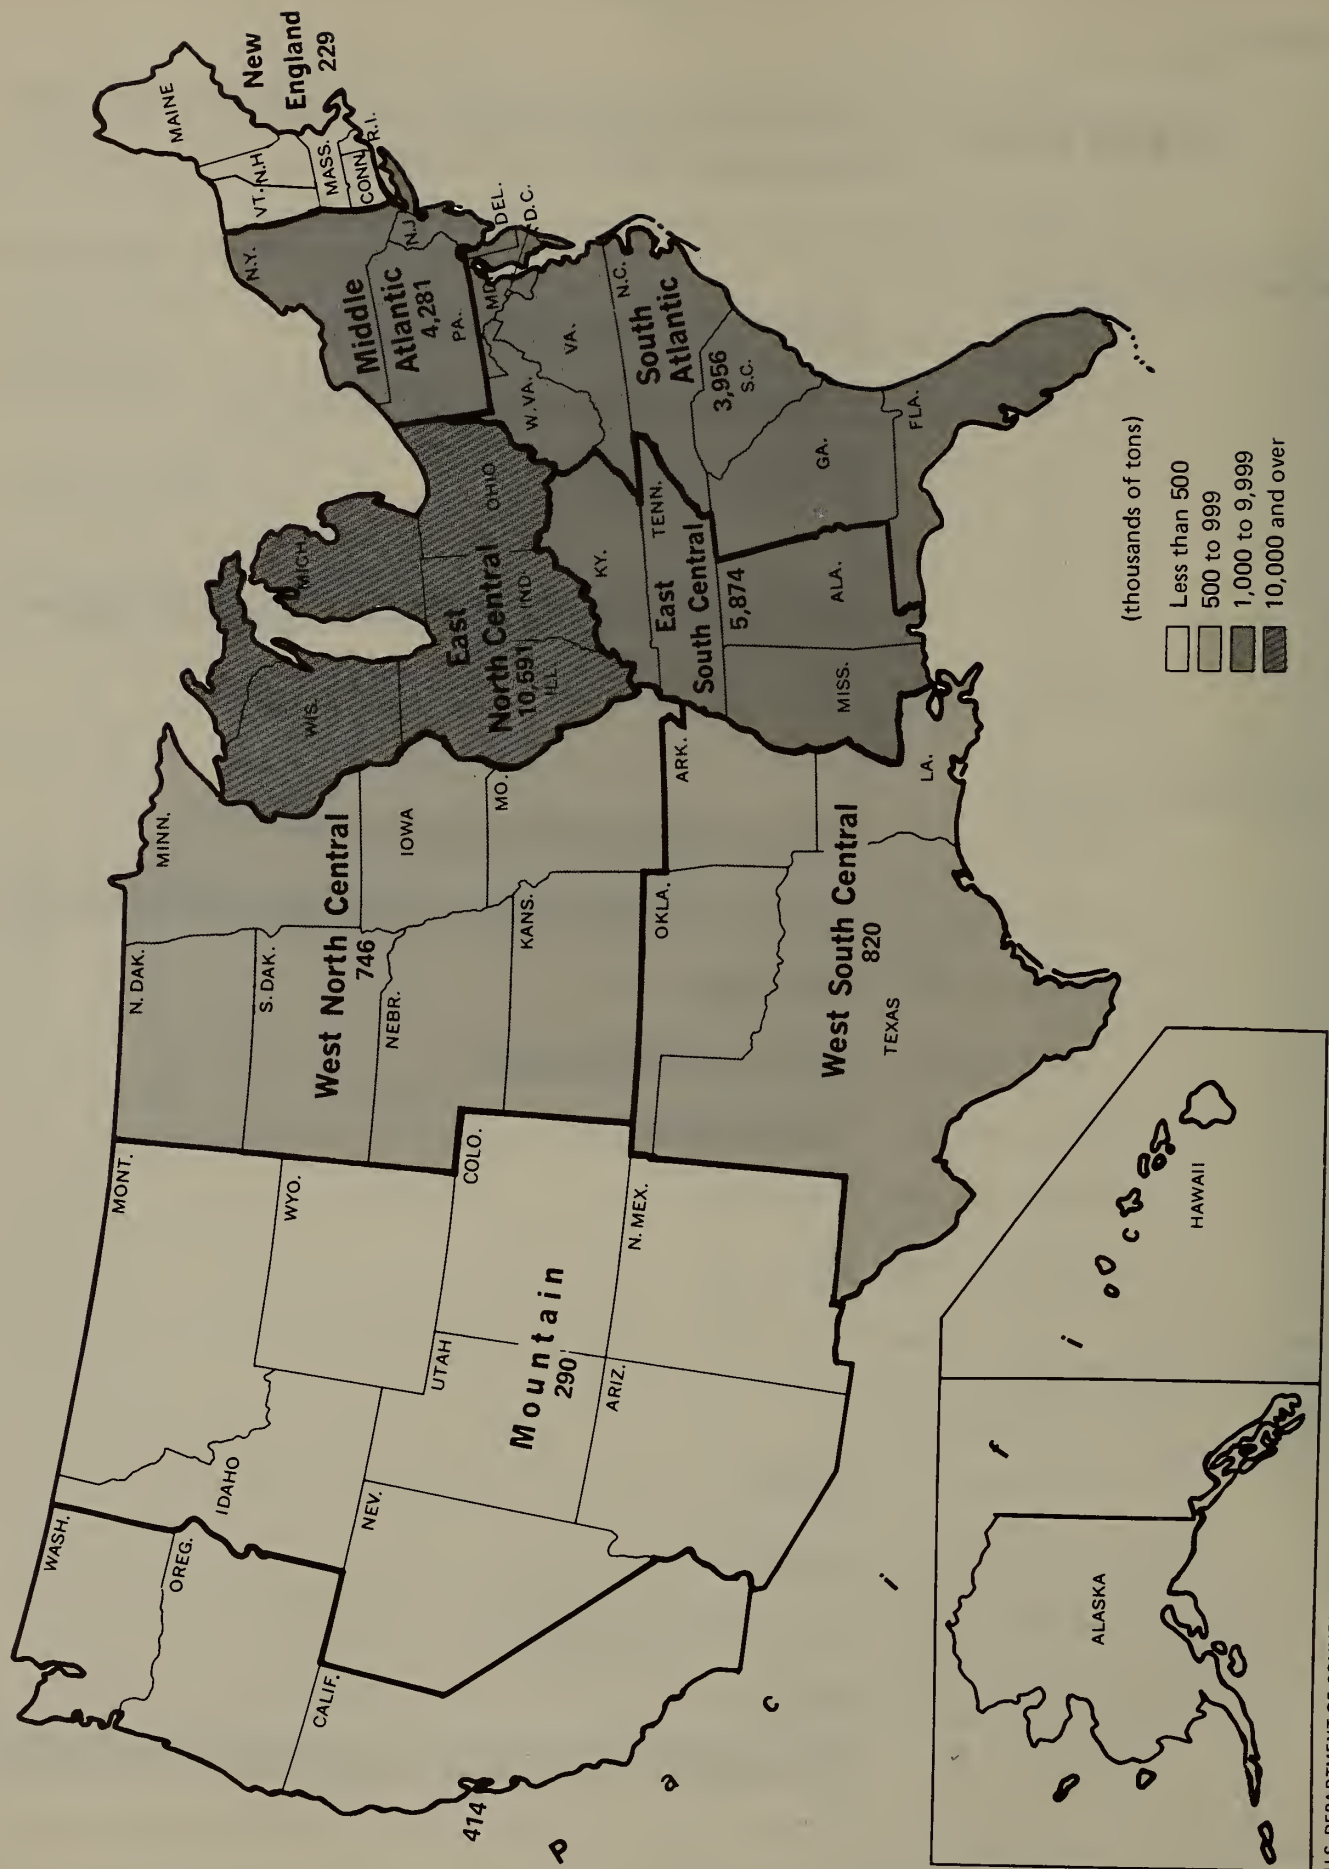

Note: See table 1 for estimates of sampling variability.

KENTUCKY

Shipments, by Geographic Division of Destination: 1972

(Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

-----	ALL OTHER MISCELLANEOUS	6,164	100.0	1.2	6.9	16.8	23.7	4.6	47.1

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 281B1 and 281B2; 28999 and 28998; 30619 and 3061B; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 3742B.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

NORTH CAROLINA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	A. Tons of Shipments								
		Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sam- pling var- iability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2081 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

SOUTH CAROLINA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.
SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookie and crackers, was included while SIC 2051 remained out of scope to the survey.
Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.
For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.
Distances of shipments to foreign destinations are calculated only to the U.S. port of export.
- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.
SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.
Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.
For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.
Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.
- Represents or rounds to zero. (X) Not applicable.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

VIRGINIA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Production Area 6—Continued

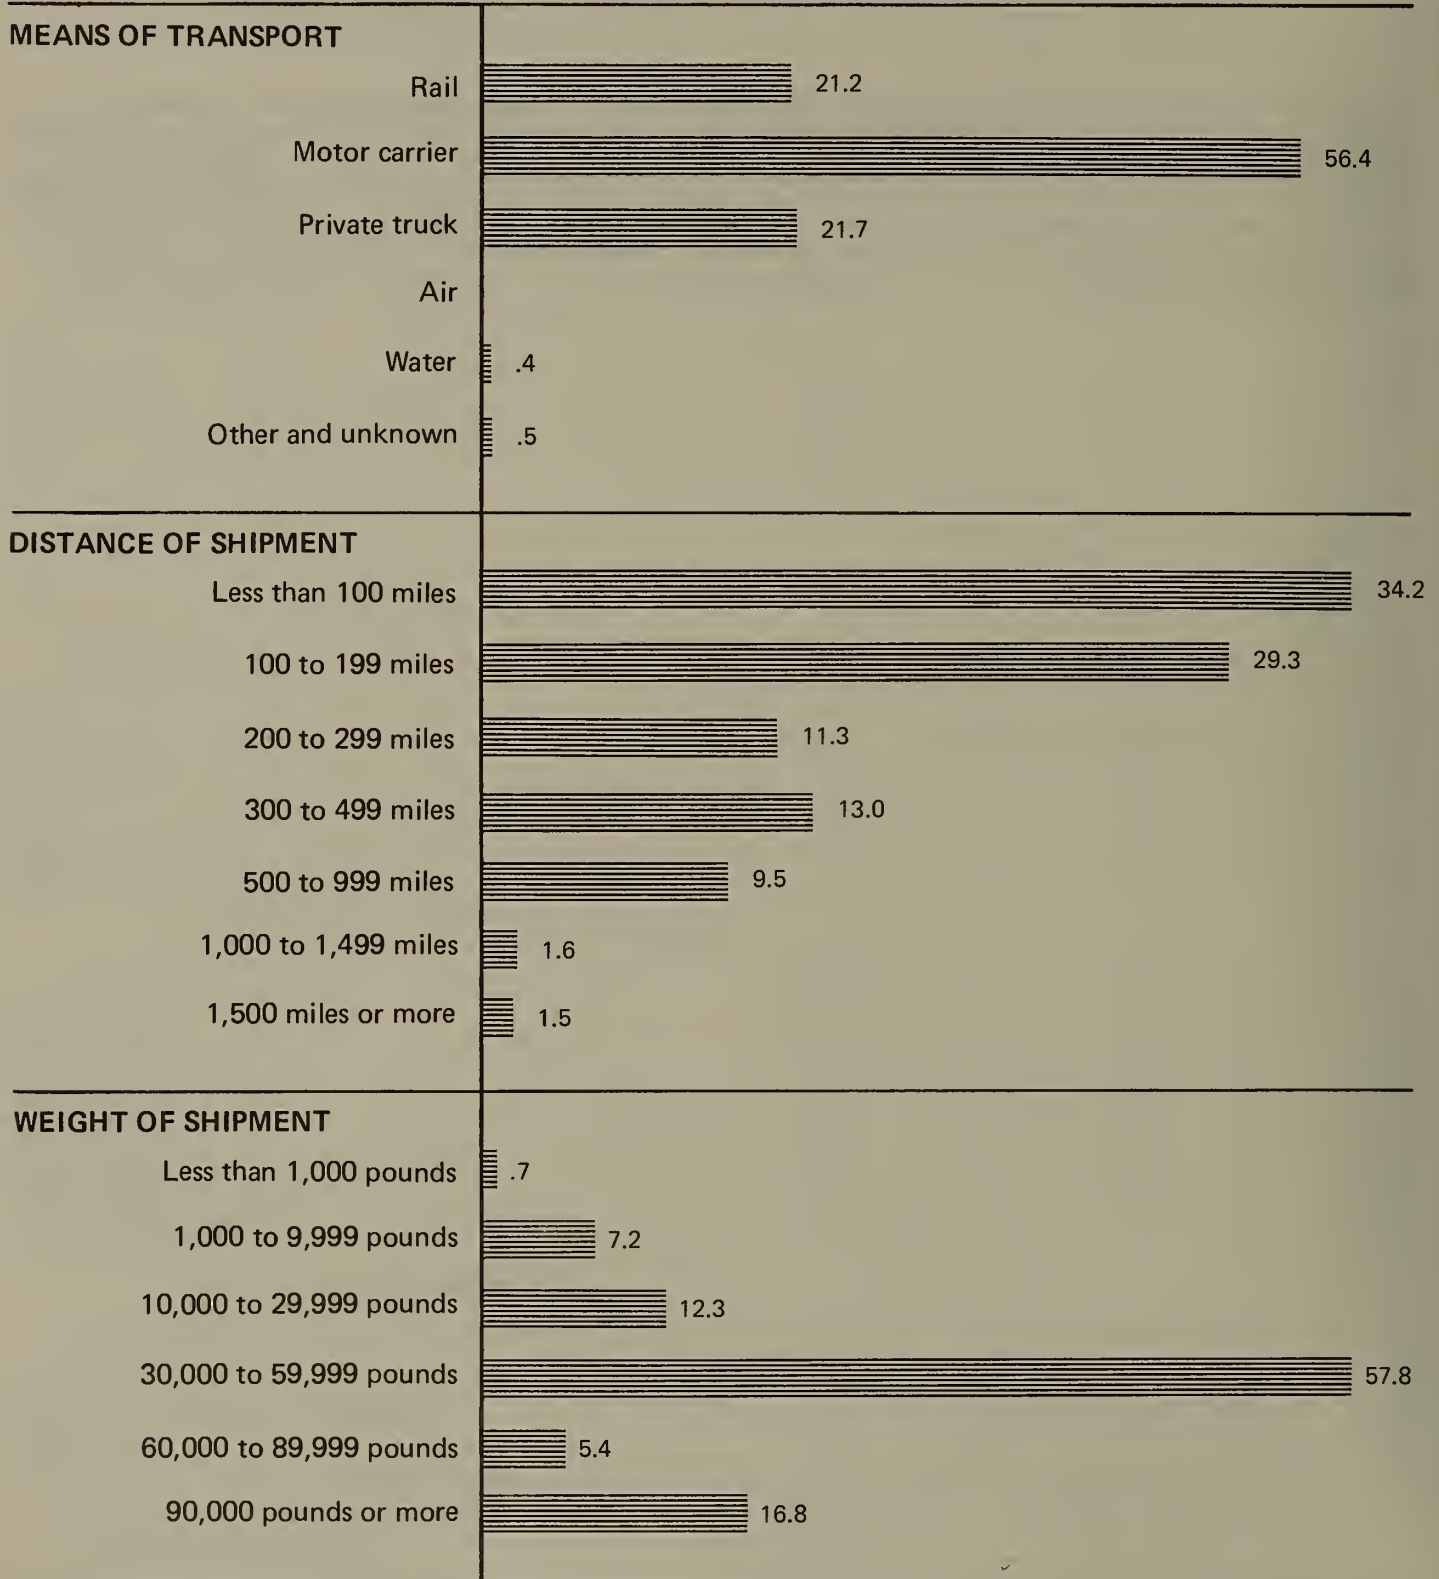

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Notes: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 19—Continued

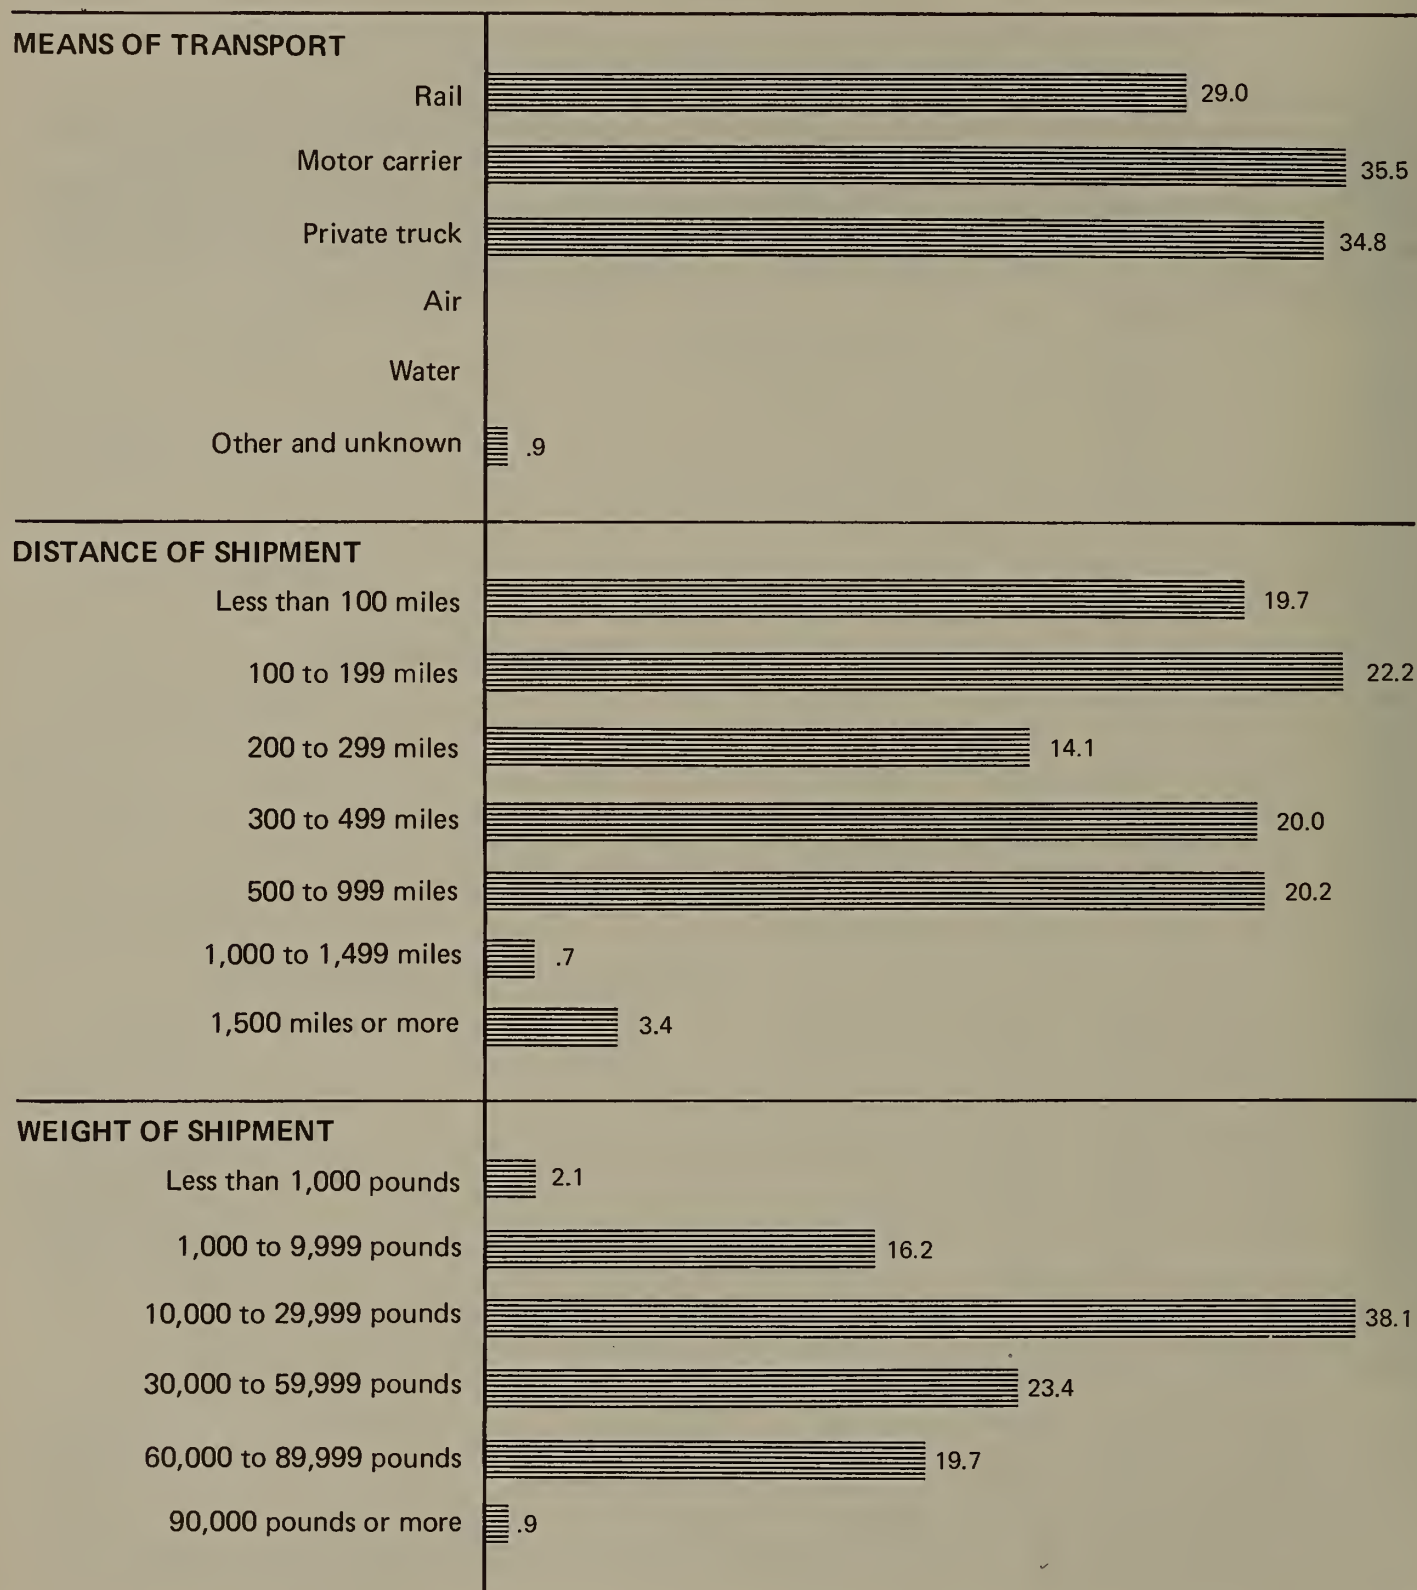

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

-----	ALL OTHER MISCELLANEOUS.	1,110	100.0	1.3	11.6	21.8	20.3	44.5	.7

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

— Represents or rounds to zero. (*) No data published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051, remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	A. Tons of Shipments								
		Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookie and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 2B1B1 and 2B1B2; 2B999 and 2B99B; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 3429B; 34999 and 3499B; and 37429 and 3742B.

Include only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Texas

Summary of Shipments Originating in This State: 1972 and 1967 (Excludes Petroleum and Coal Products)

Item	1972		1967

1,000 to 1,499 miles do	14.8	35.9	11.2	31.8	
1,500 miles or more do	2.4	8.1	3.3	13.2	

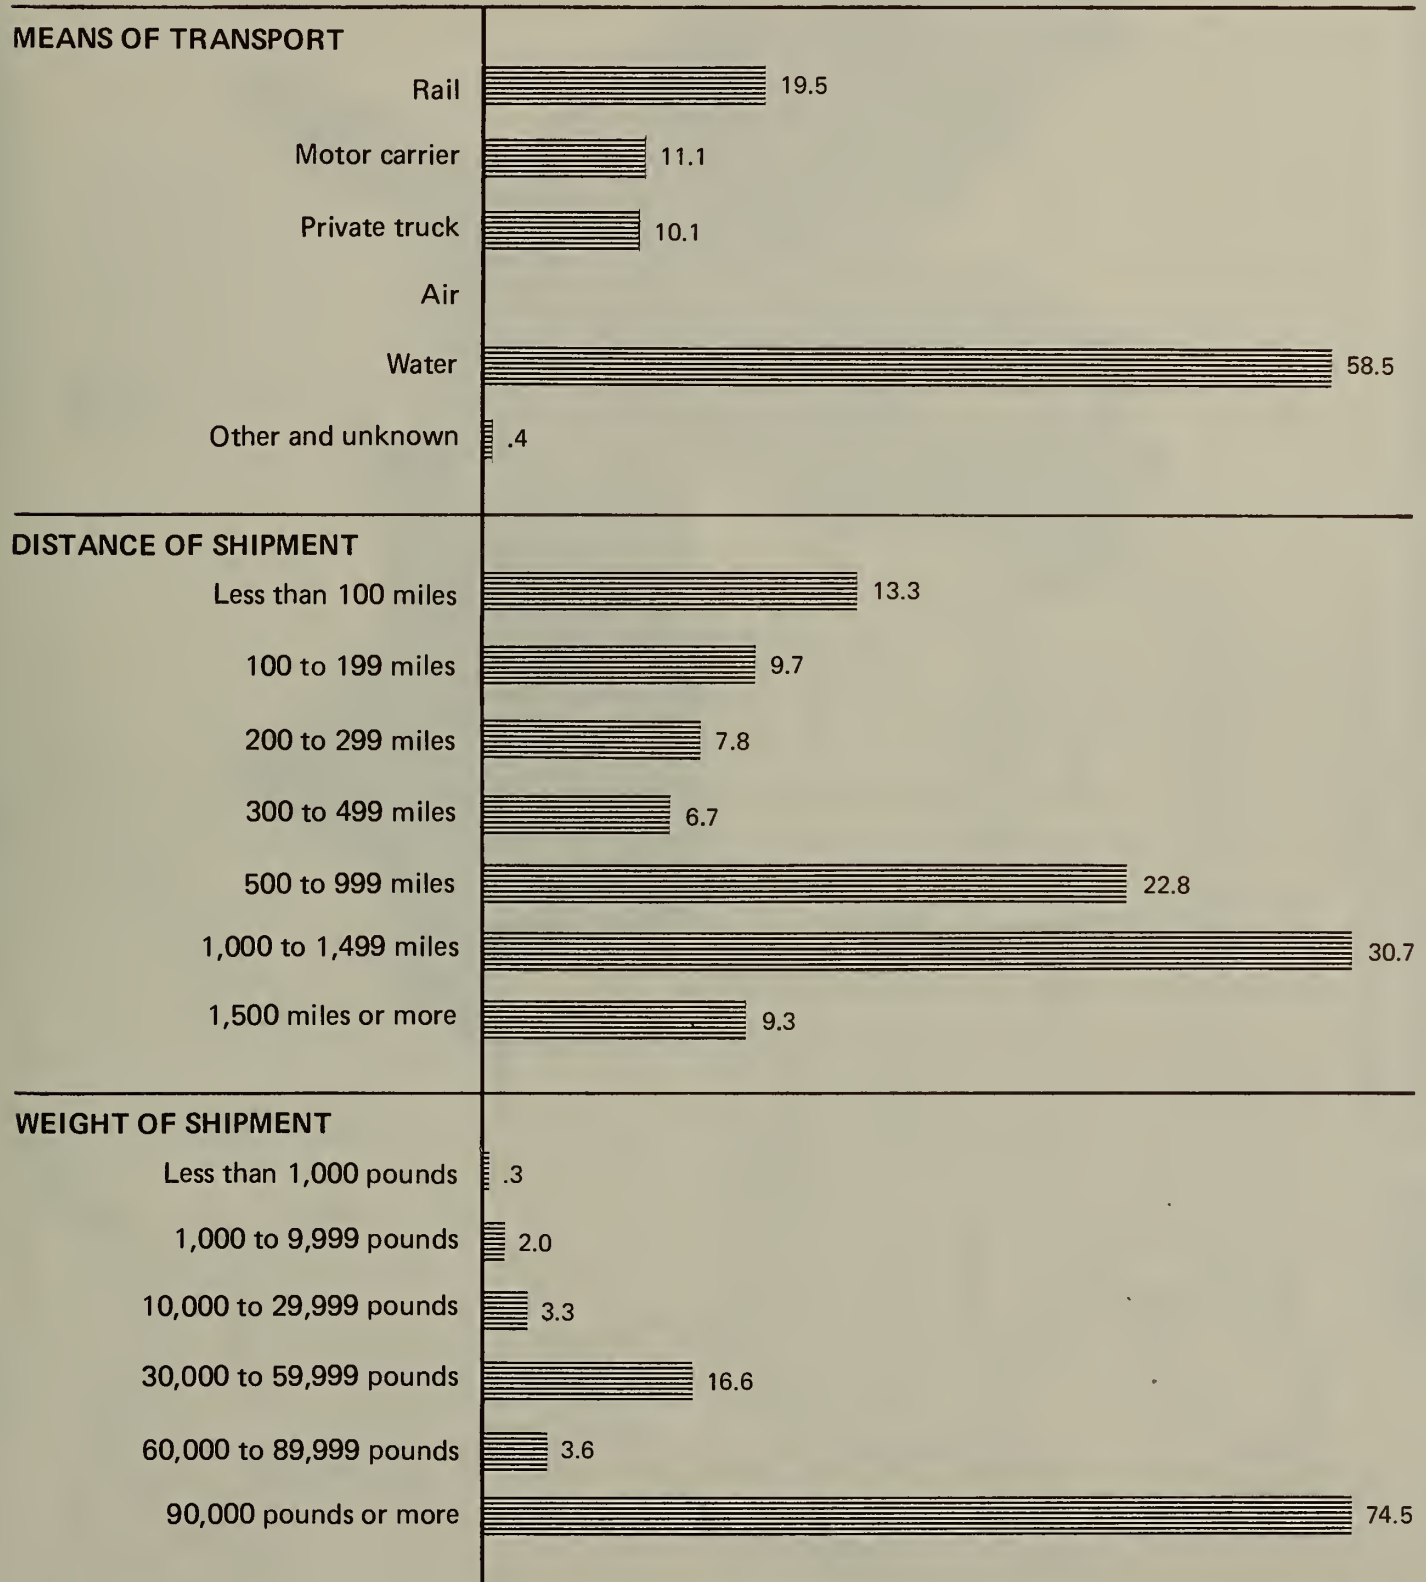

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity. The published 1967 estimate of tons shipped for Products of Petroleum Refining (TCC 291) for the State of Texas was revised from 206,017,000 to 134,261,000 with a commensurate impact on the total tons of all commodities shipped. Revised 1967 data for ton-miles is not available, consequently comparative data for Texas for 1967 and 1972 are shown excluding petroleum.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

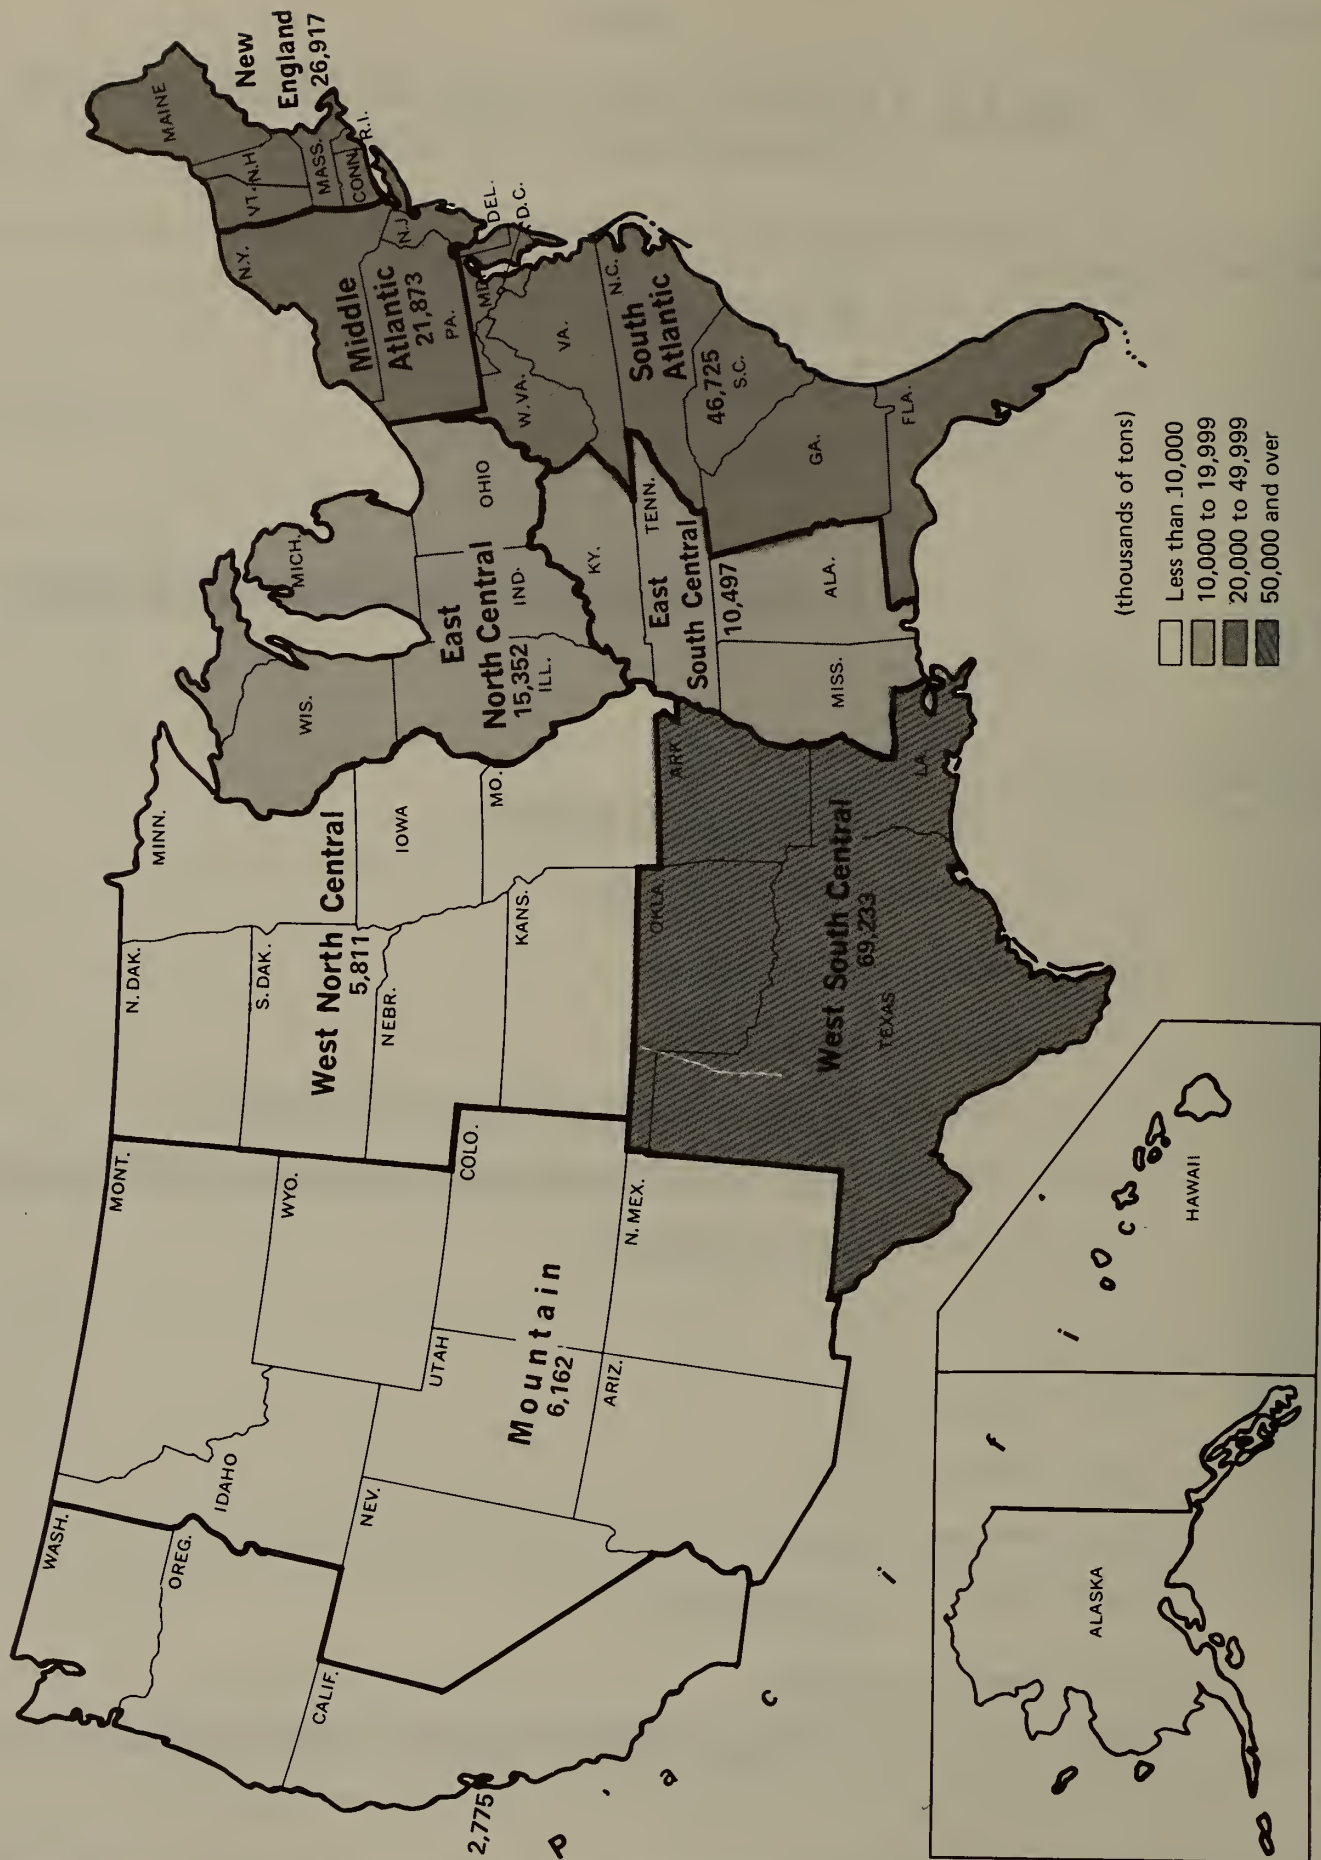

CHART 1.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Production Area 20—Continued

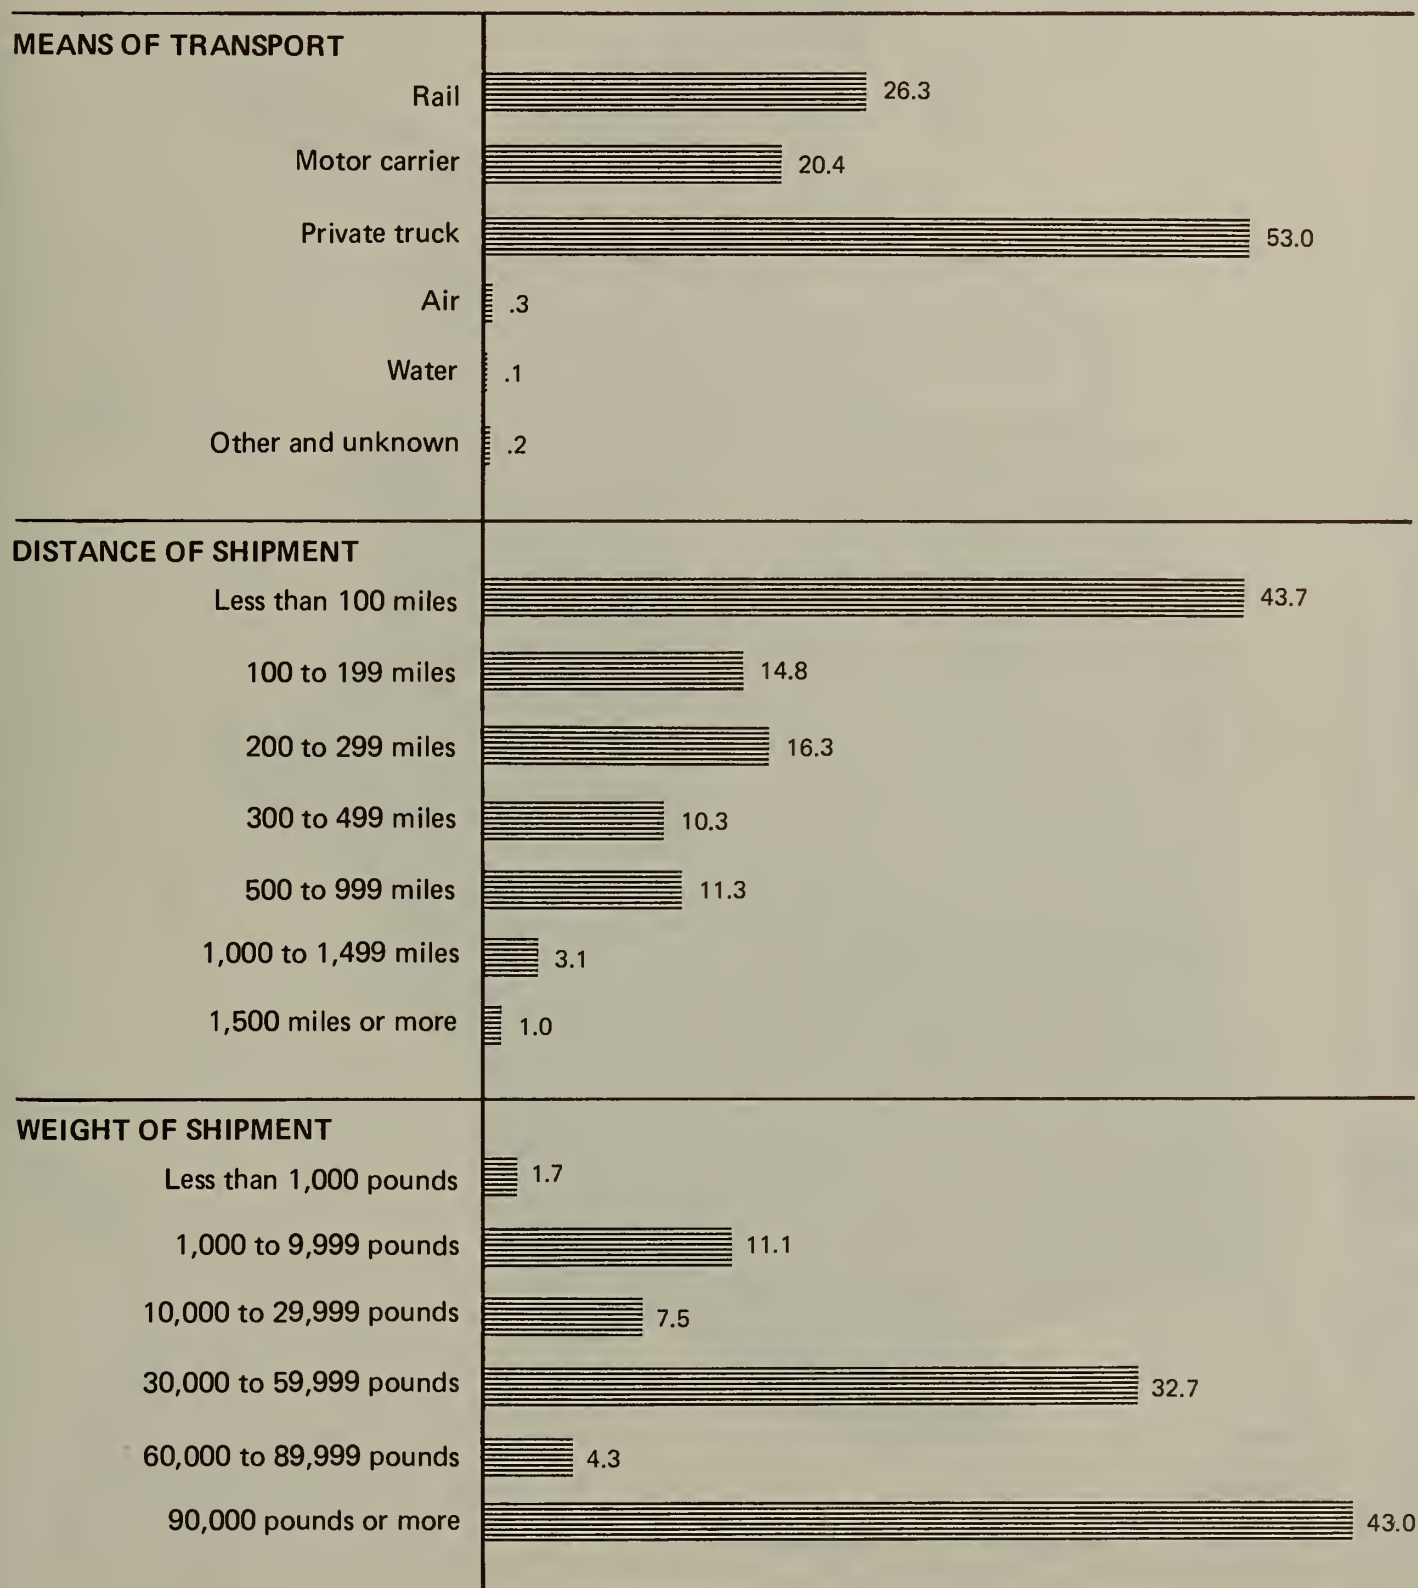

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 21—Continued

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

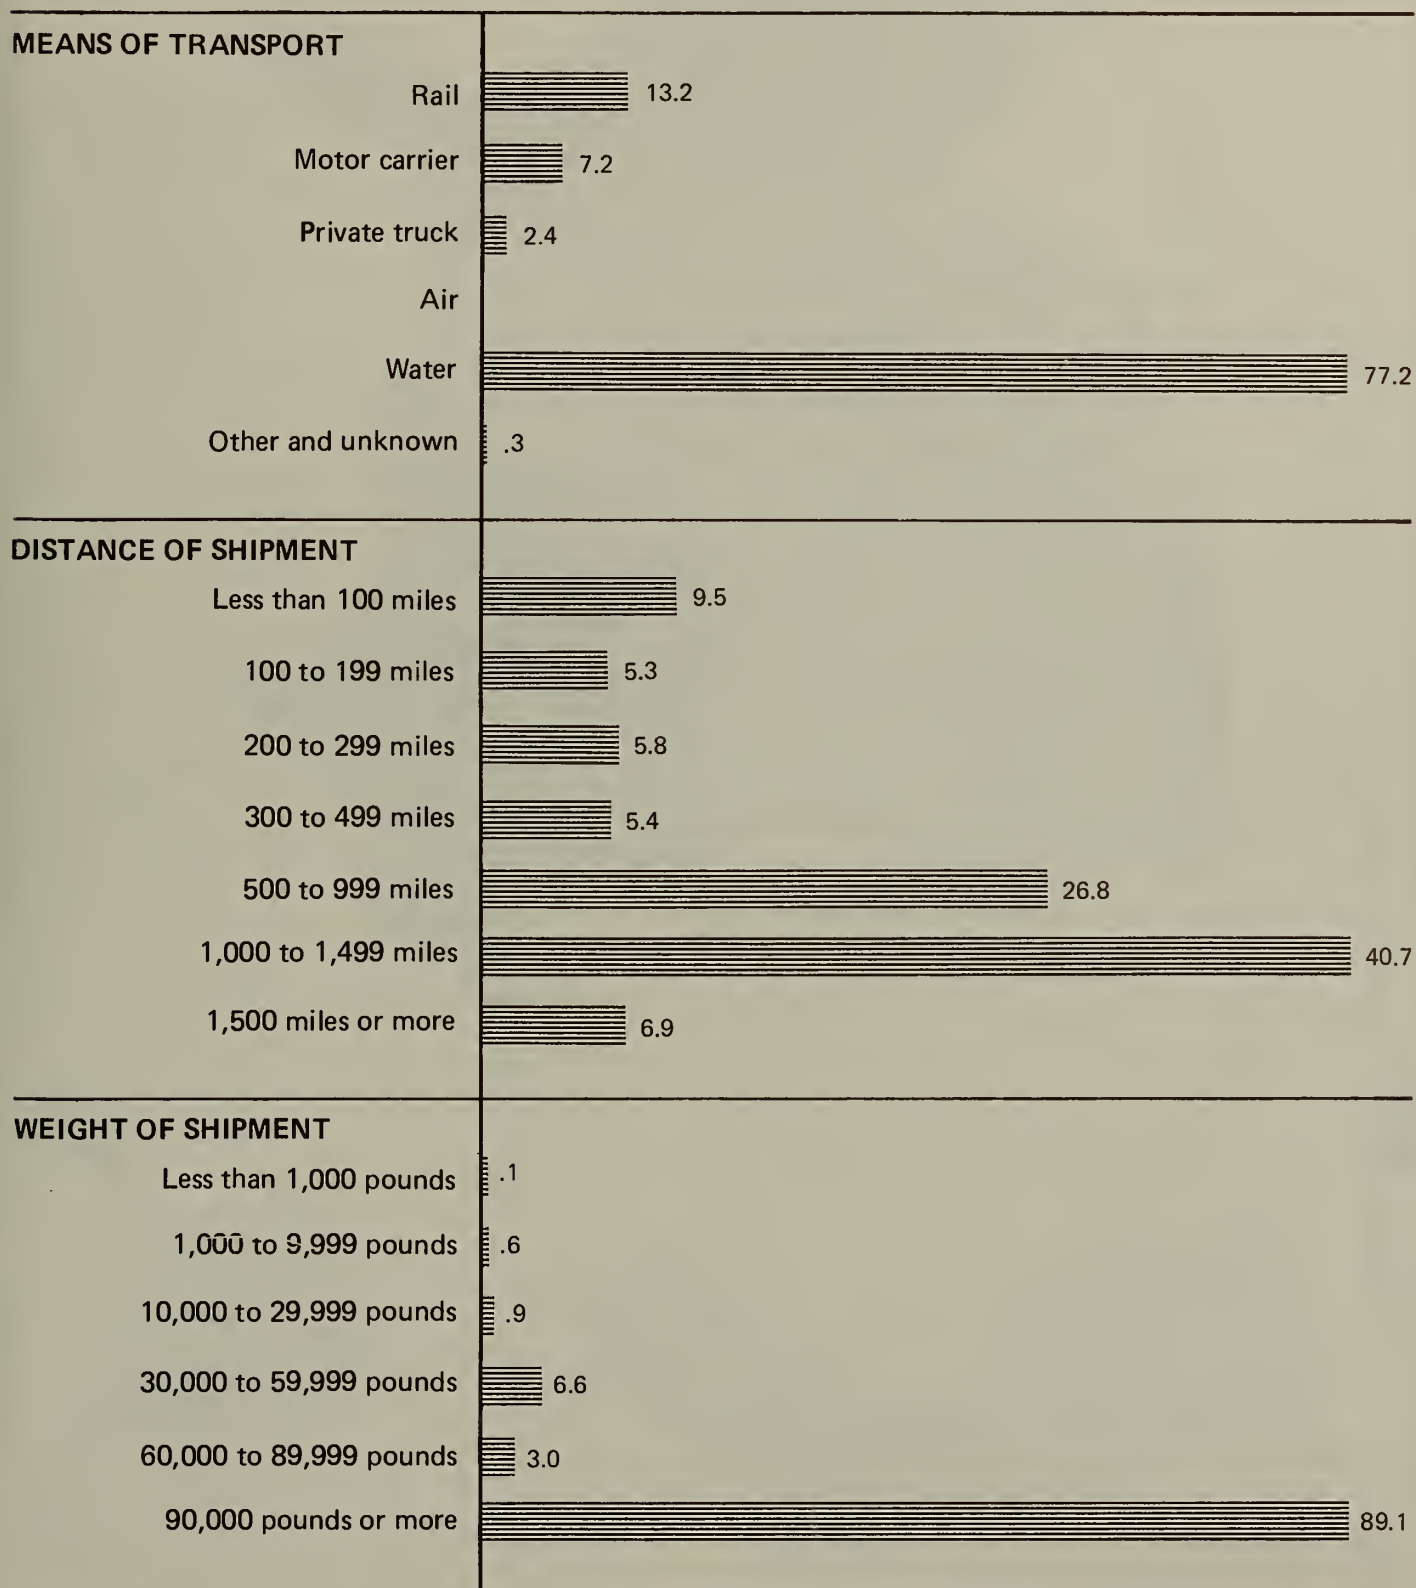

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity. The published 1967 estimate of tons shipped for Products of Petroleum Refining (TCC 291) for Production Area 21 was revised from 157,071,000 to 85,315,000 with a commensurate impact on the total tons of all commodities shipped. Revised 1967 data for ton-miles is not available, consequently, comparative data for Production Area 21 for 1967 and 1972 are shown excluding petroleum.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28161 and 28162; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero, (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

-----	ALL OTHER MISCELLANEOUS.	39,959	100.0	3.1	3.3	6.2	12.7	19.2	5.2	50.7

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero. (*) Data not published for 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

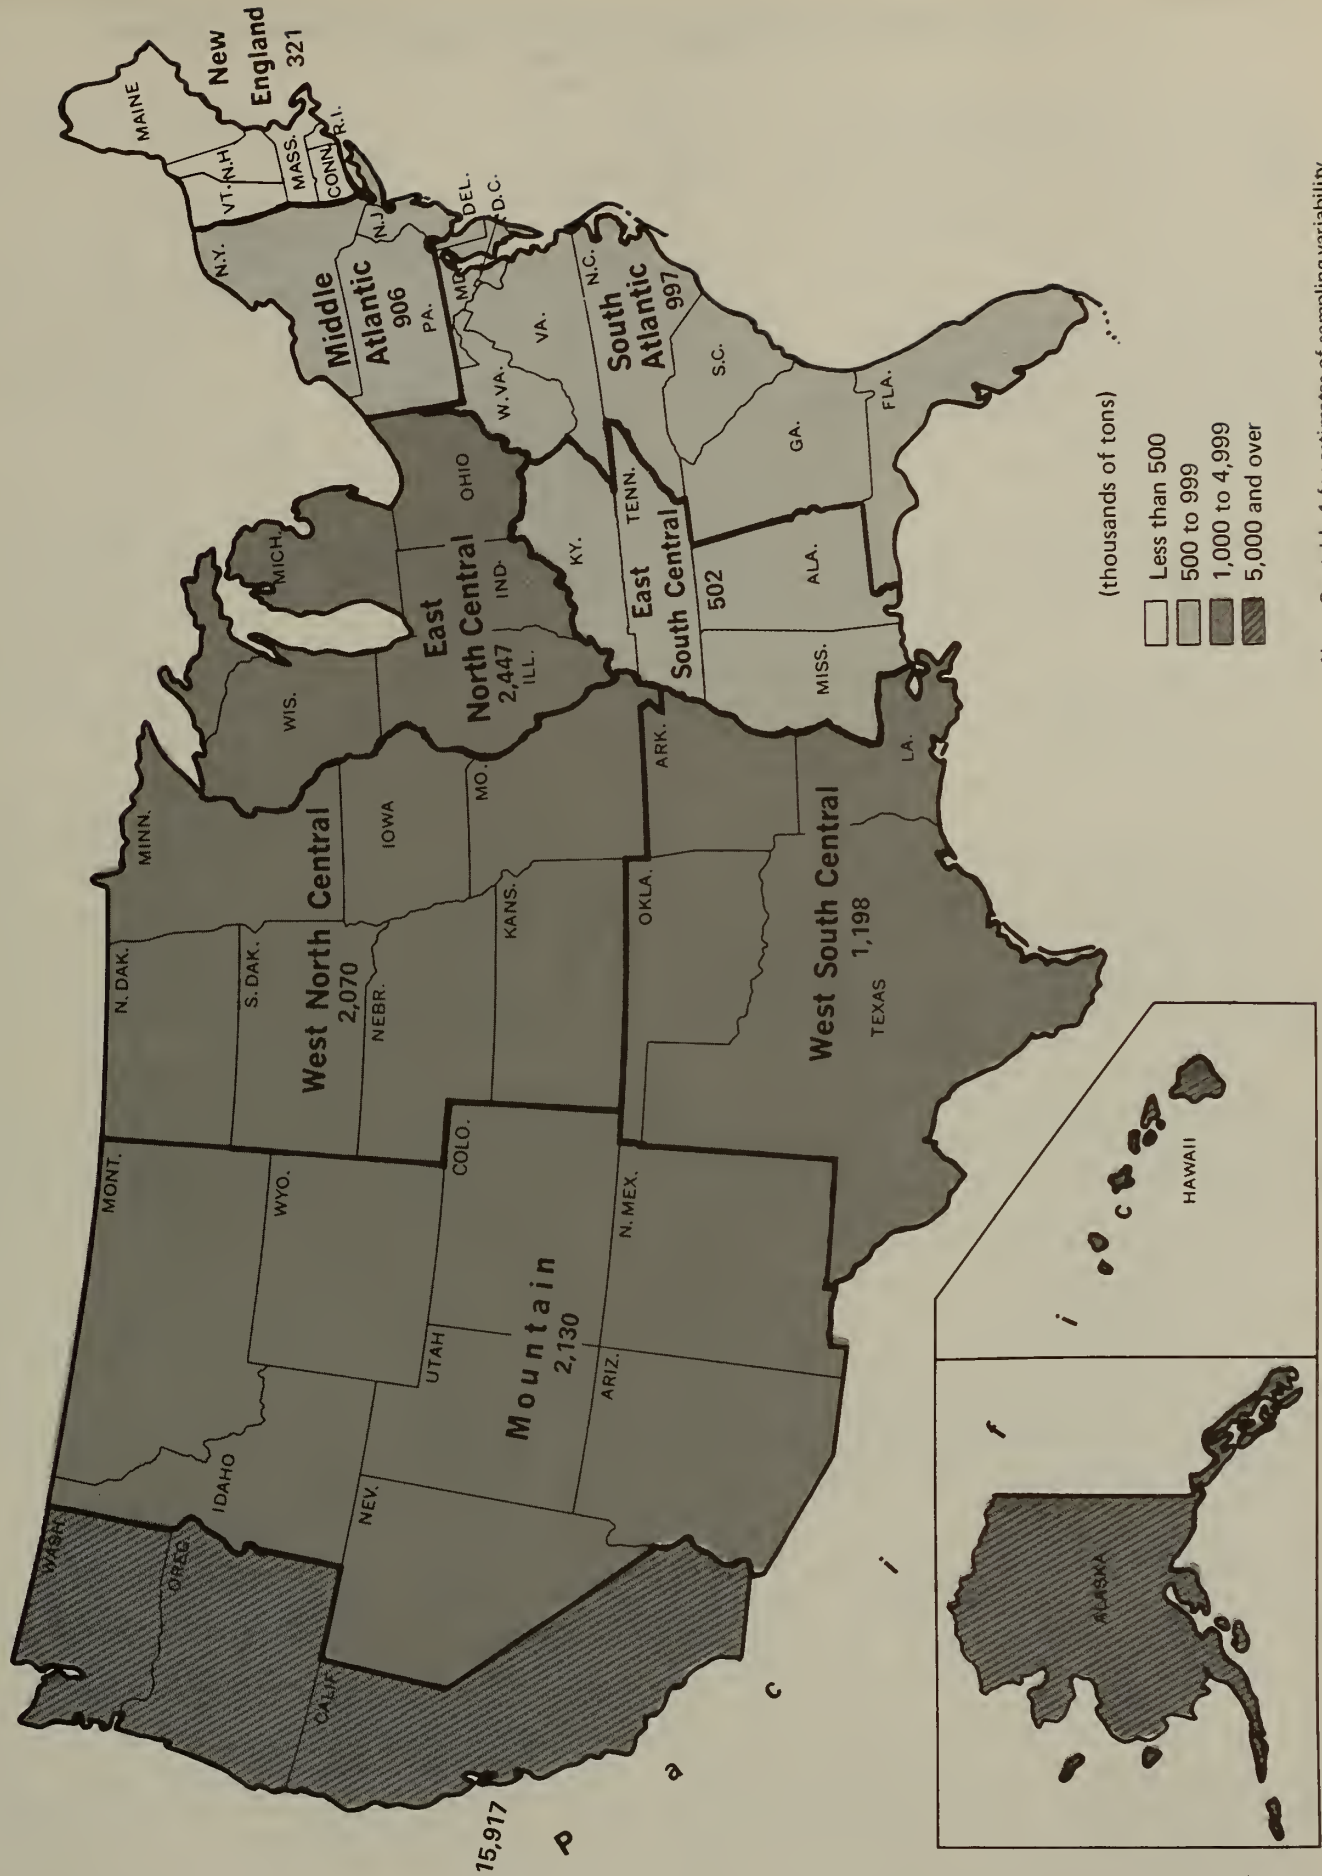

OREGON *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

OREGON

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

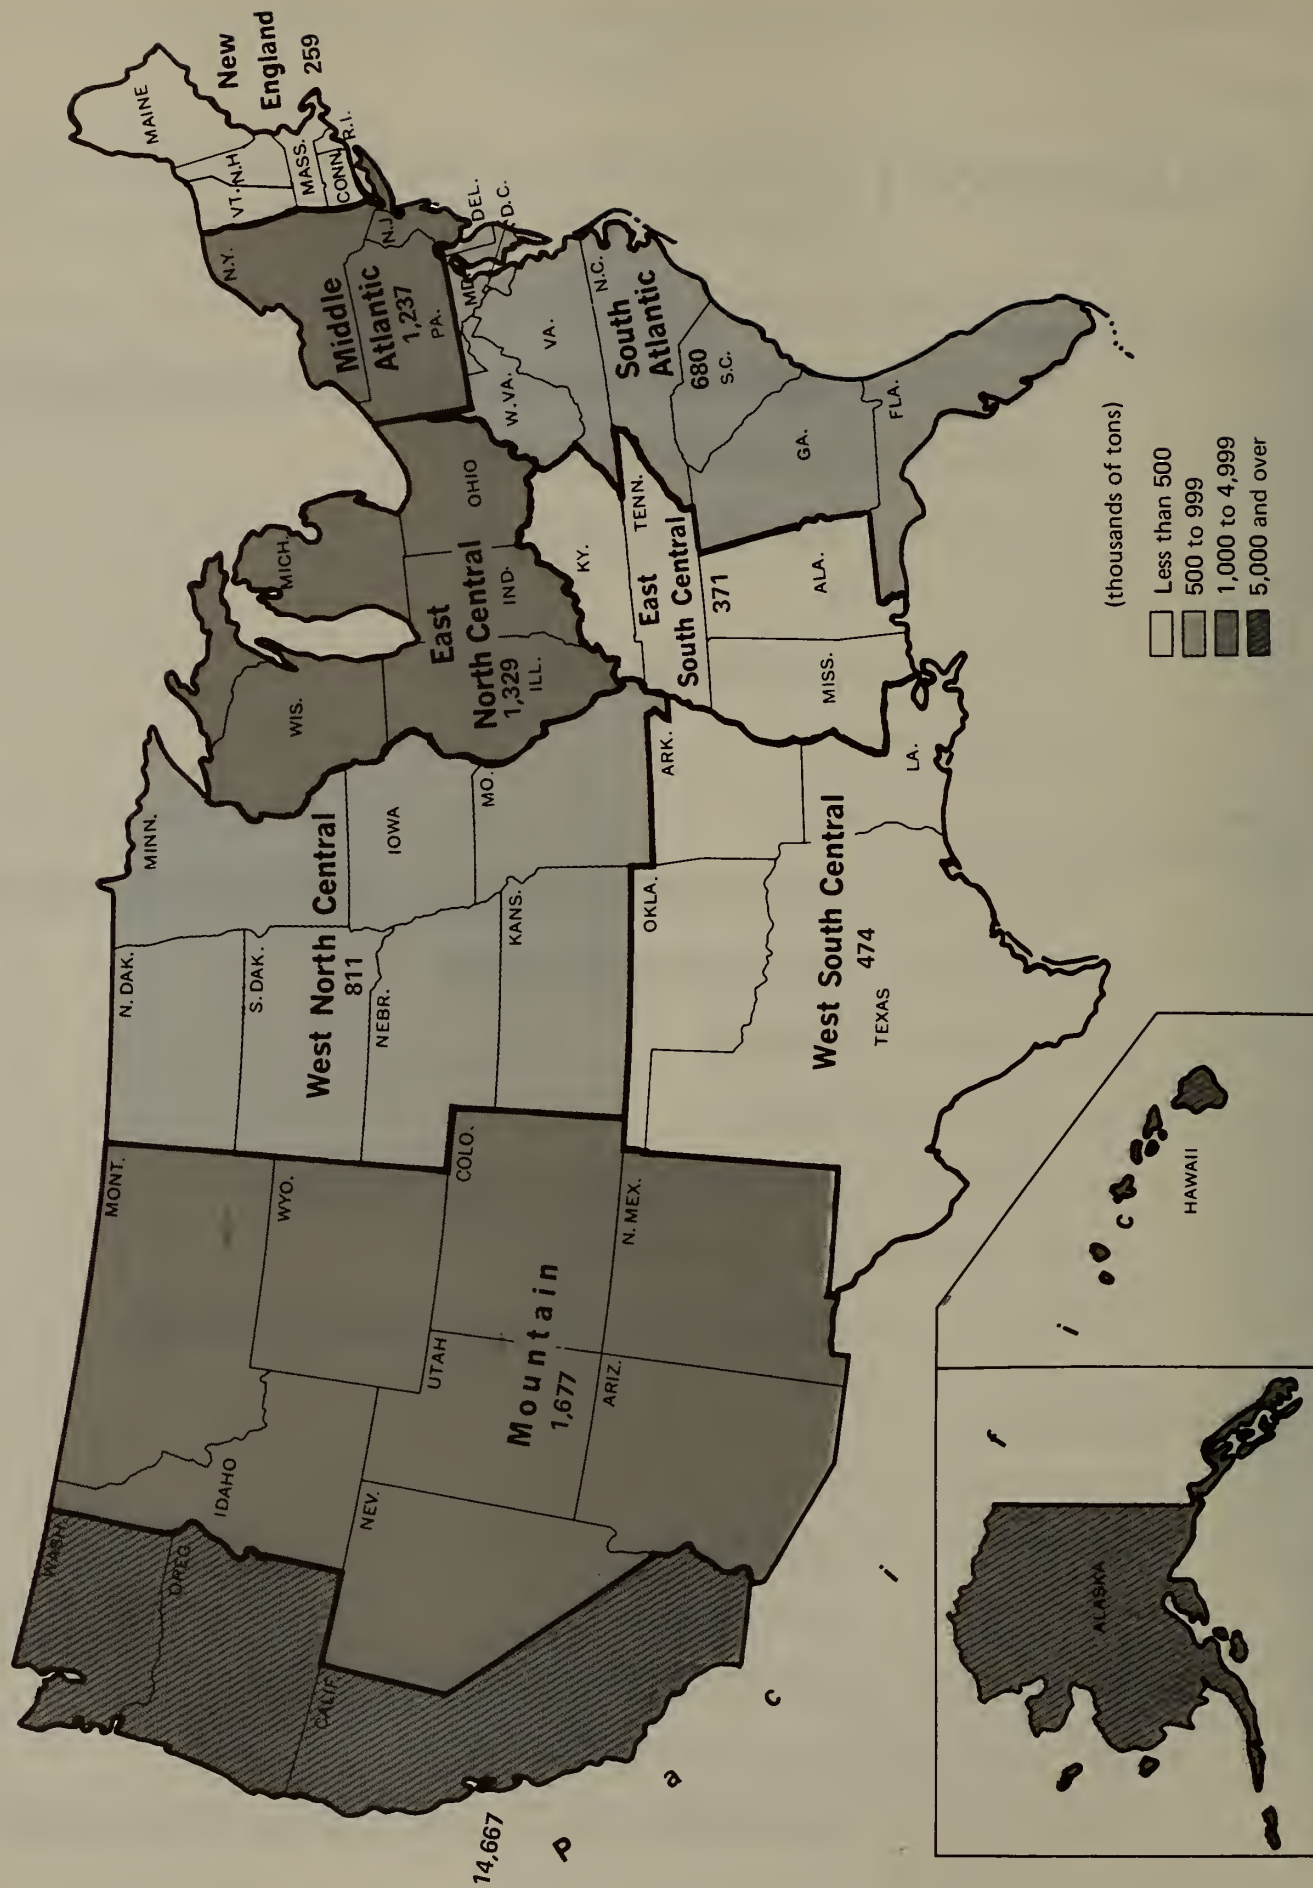

WASHINGTON | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

WASHINGTON

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Production Area 22—Continued

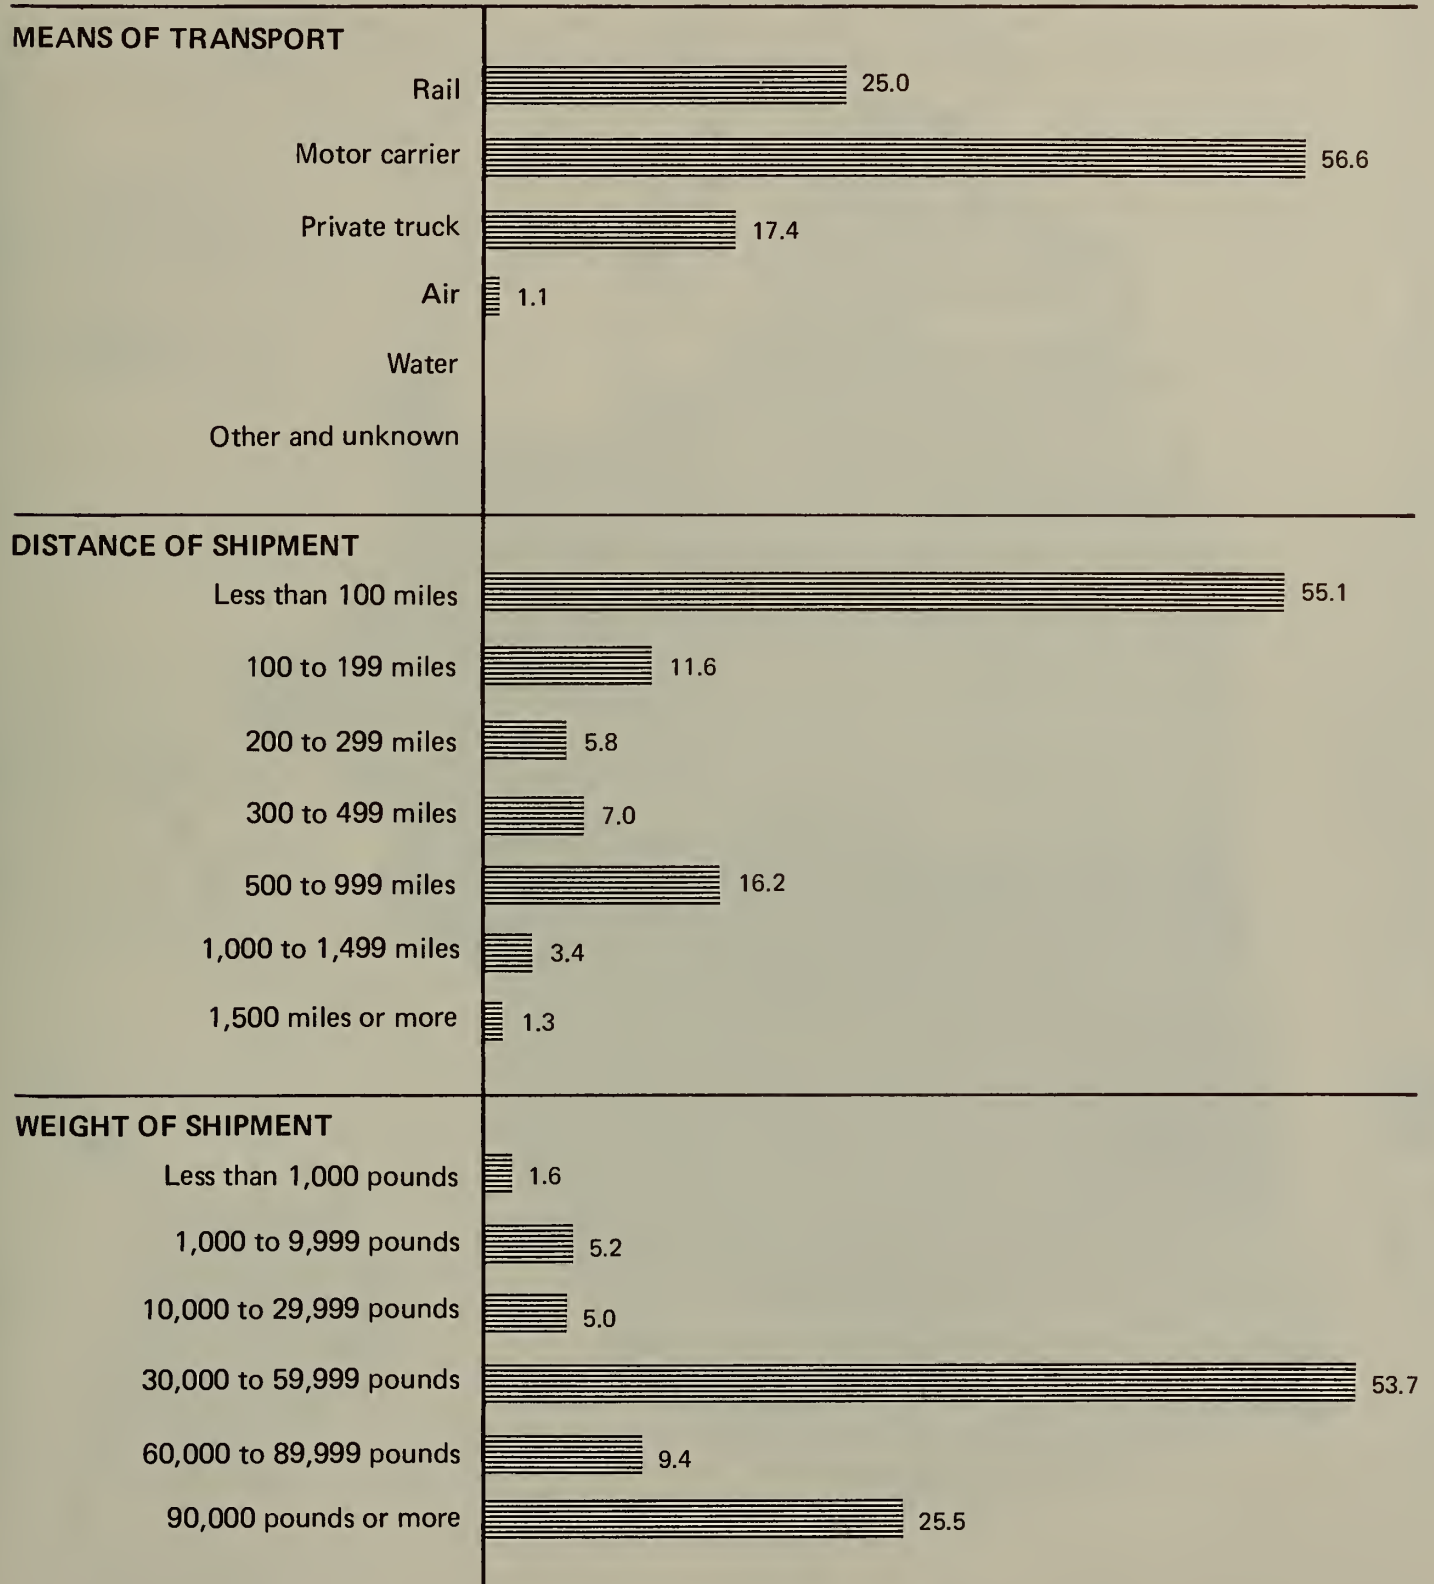

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity. — Represents or rounds to zero.

See numbered footnotes on reverse.

Production Area 23—Continued

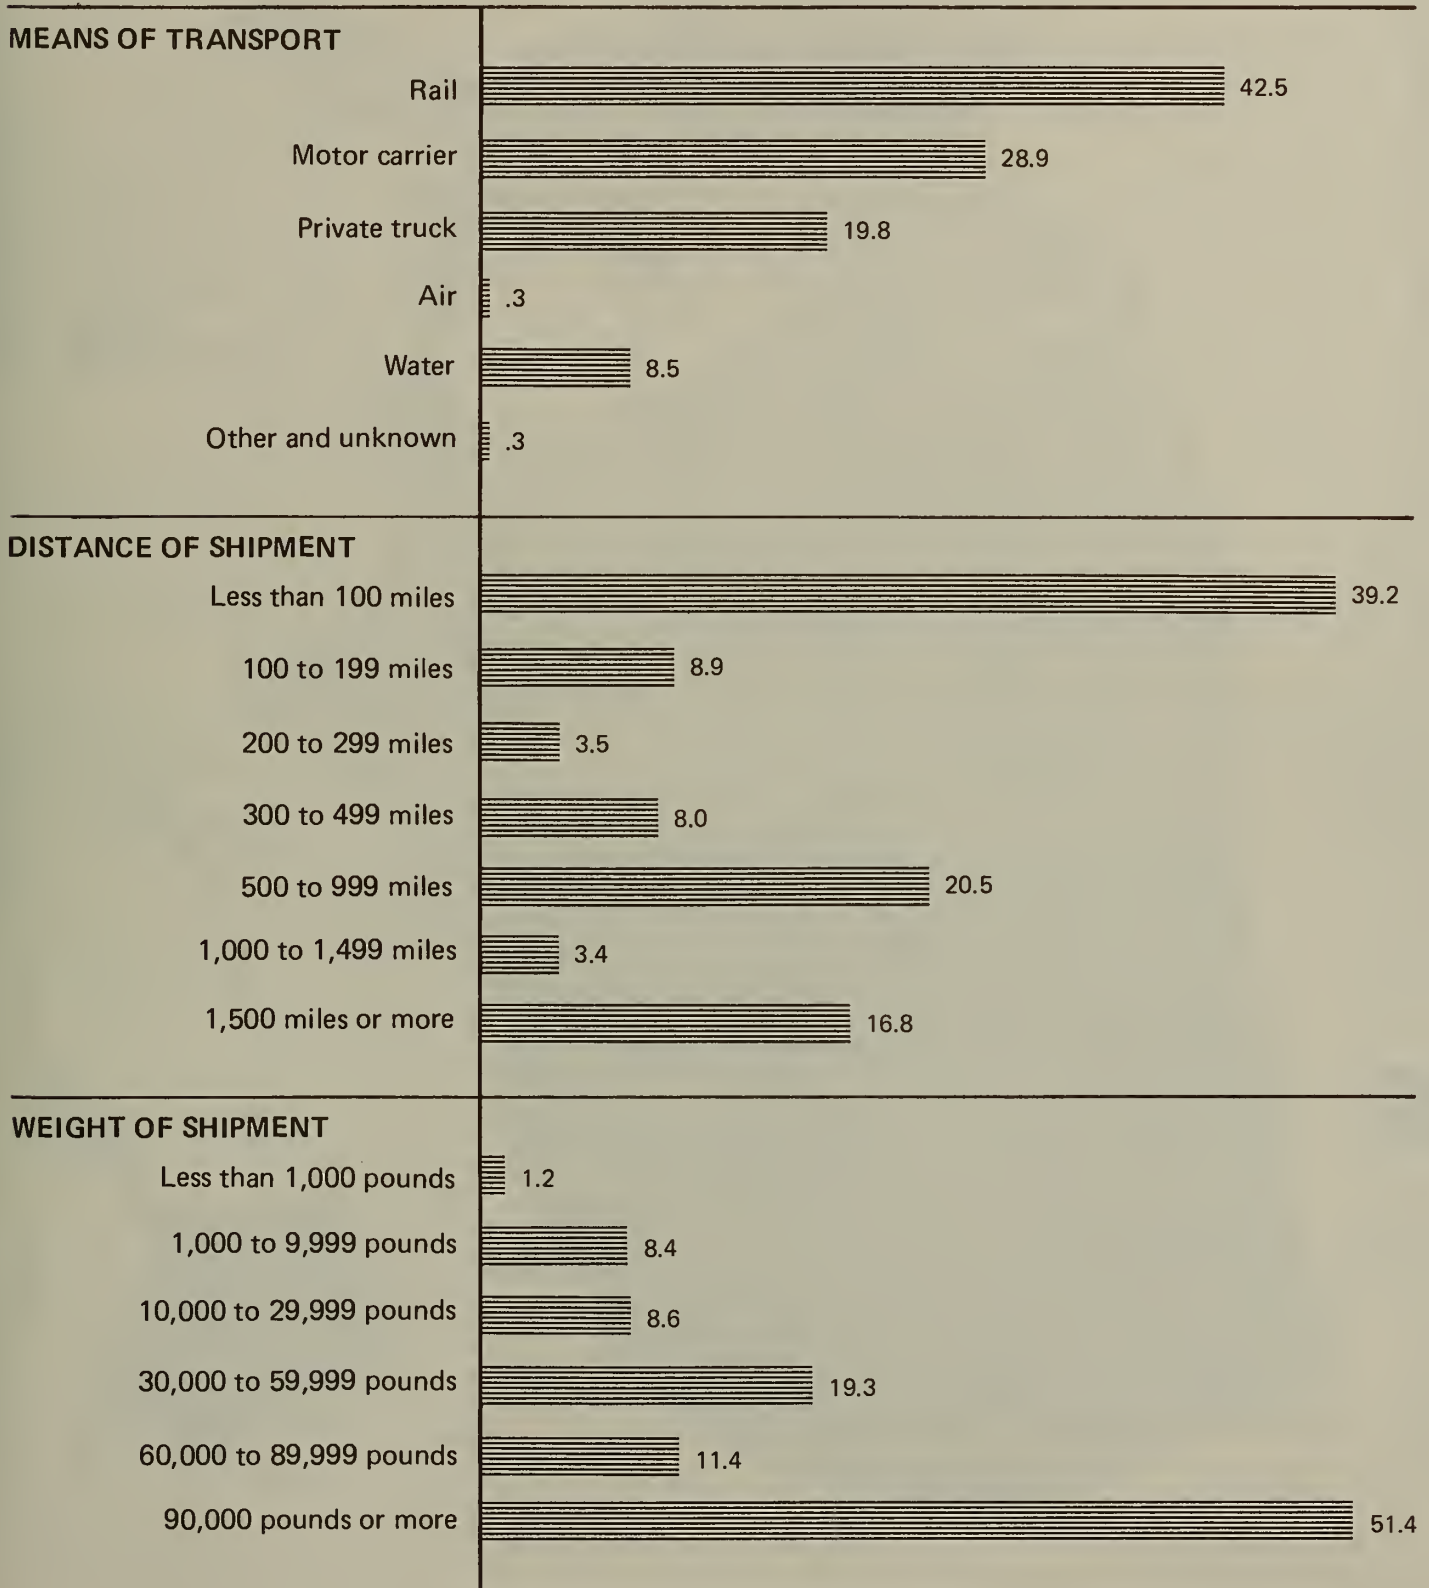

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

CHART 1.

PRODUCTION AREA **23** *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero.

Production Area 24—Continued

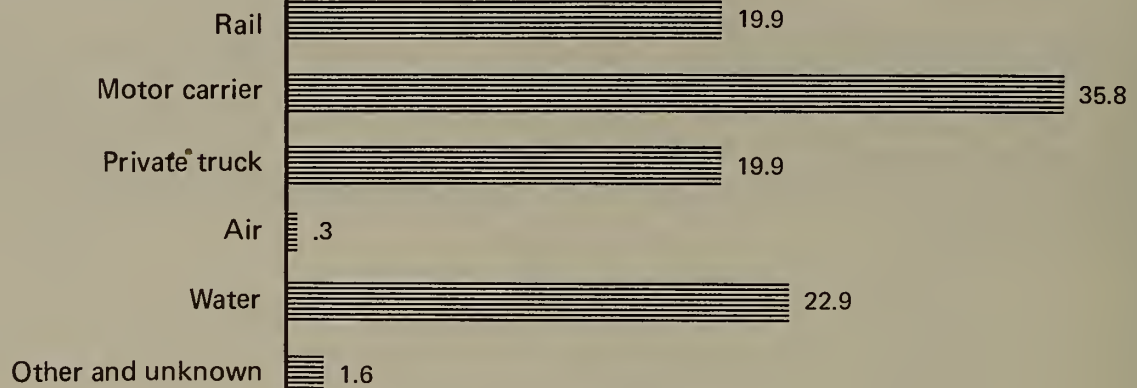

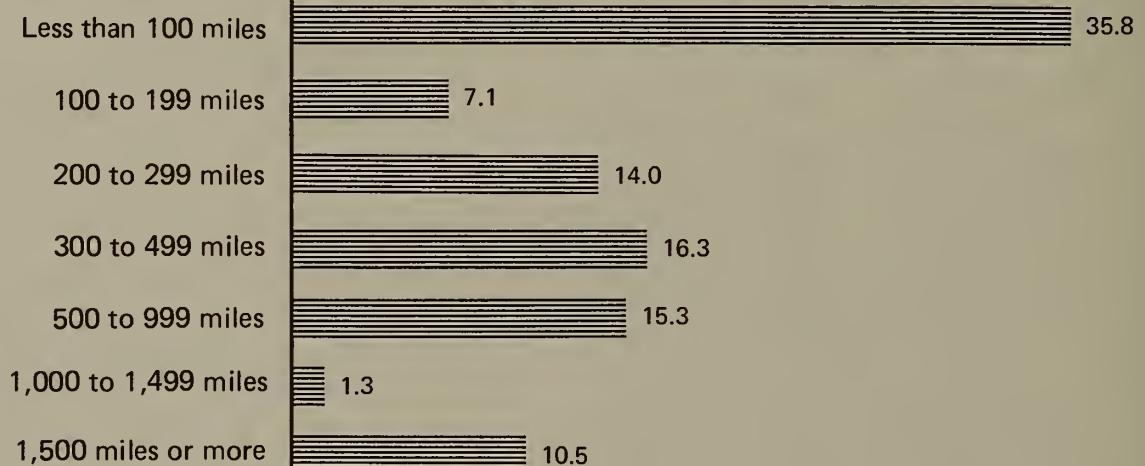

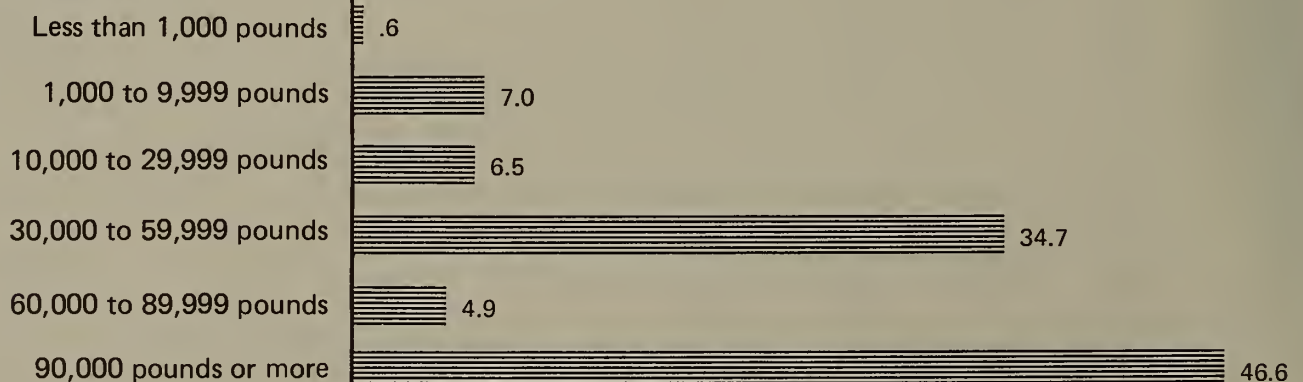

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero, (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.
SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.
Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.
For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.
Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.
- Represents or rounds to zero. (X) Not applicable.

Production Area 25—Continued

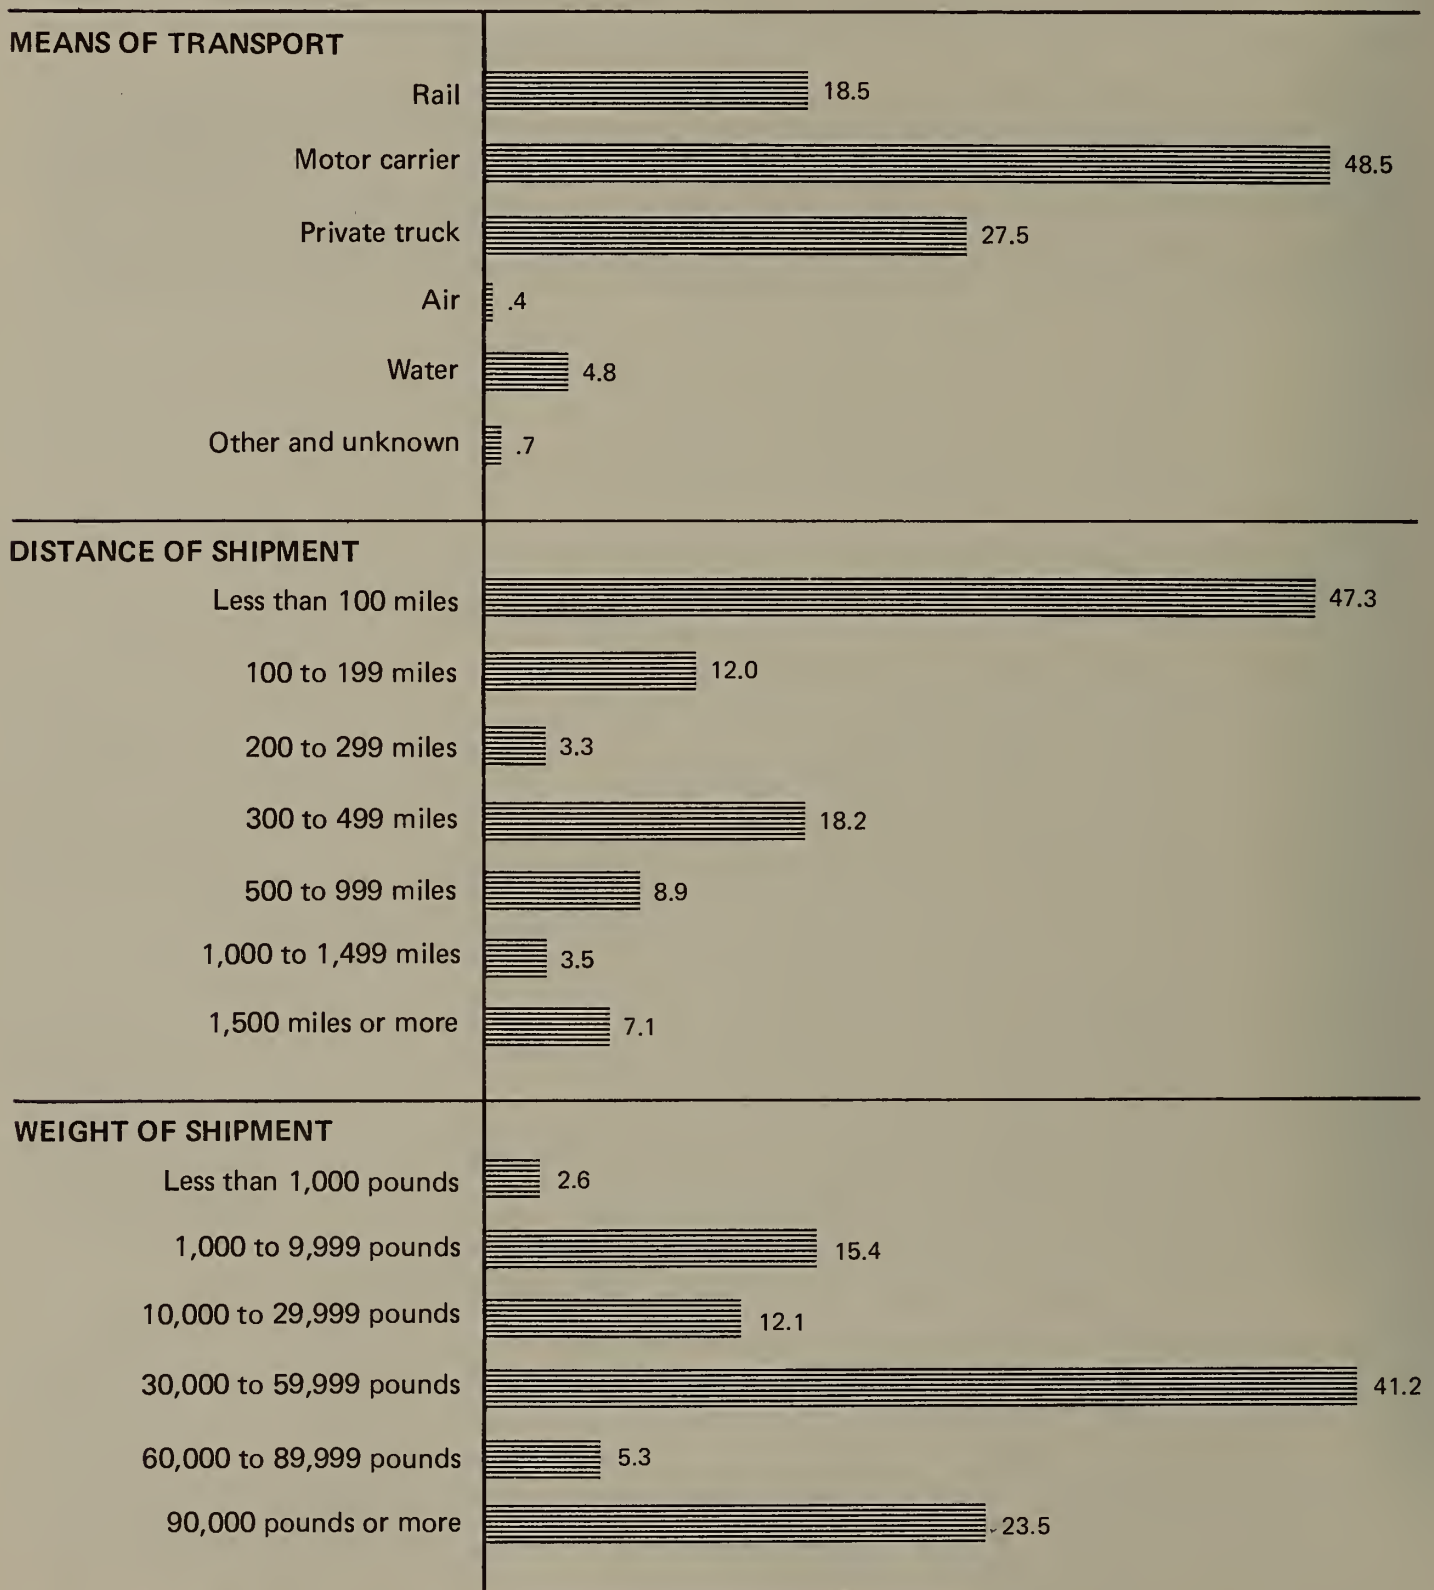

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

Note: The published 1967 estimate of tons shipped for Products of Petroleum Refining (TCC 291) was revised from 393,573,000 to 277,033,000 with a commensurate impact on the total tons of all commodities shipped. Revised 1967 data for ton-miles is not available, consequently U.S. Summary comparative data are shown for 1967 and 1972 excluding petroleum. Estimates of sampling variability may be found in the data tables.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis.

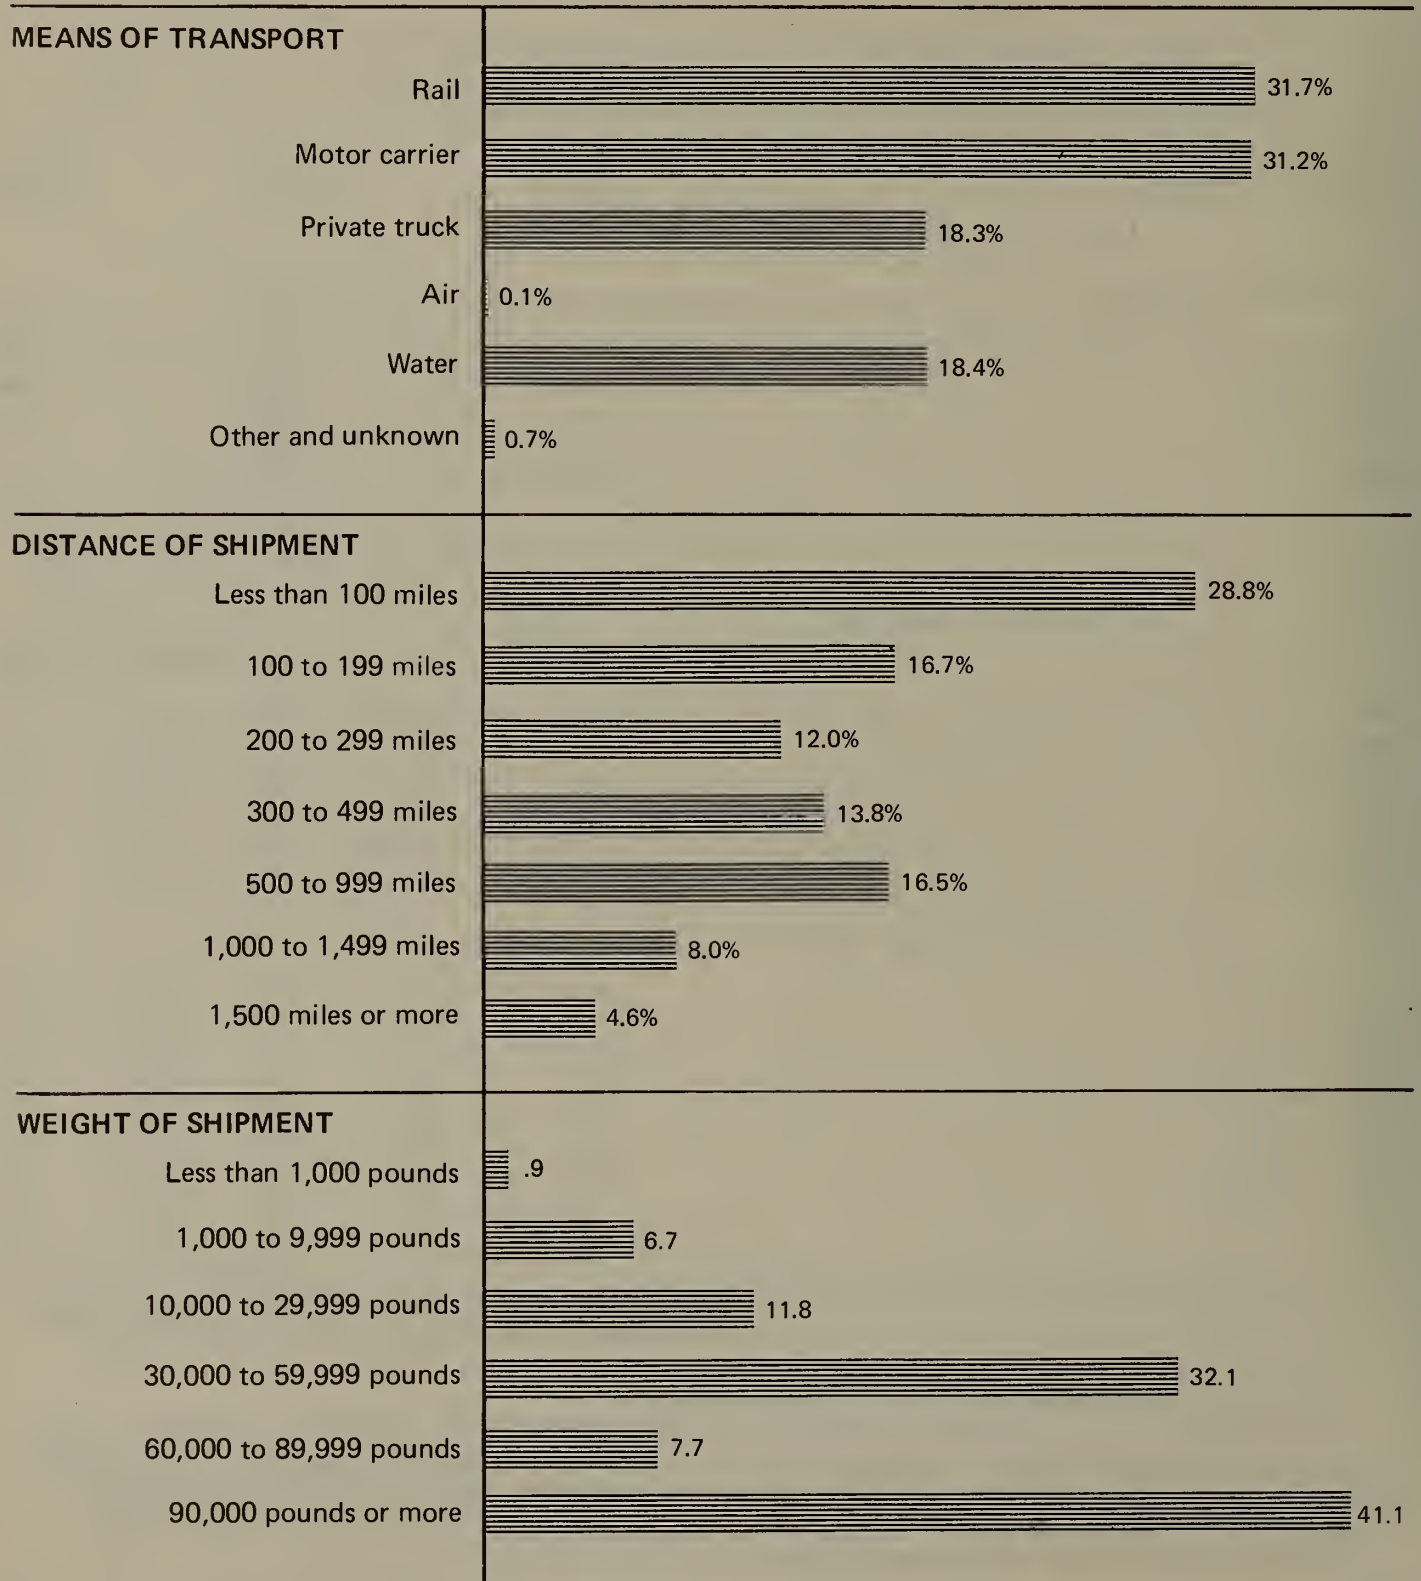

² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances.

³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

⁴ Distances of shipments to foreign desitnations are calculated only to the U.S. port of export.

CHART 1.

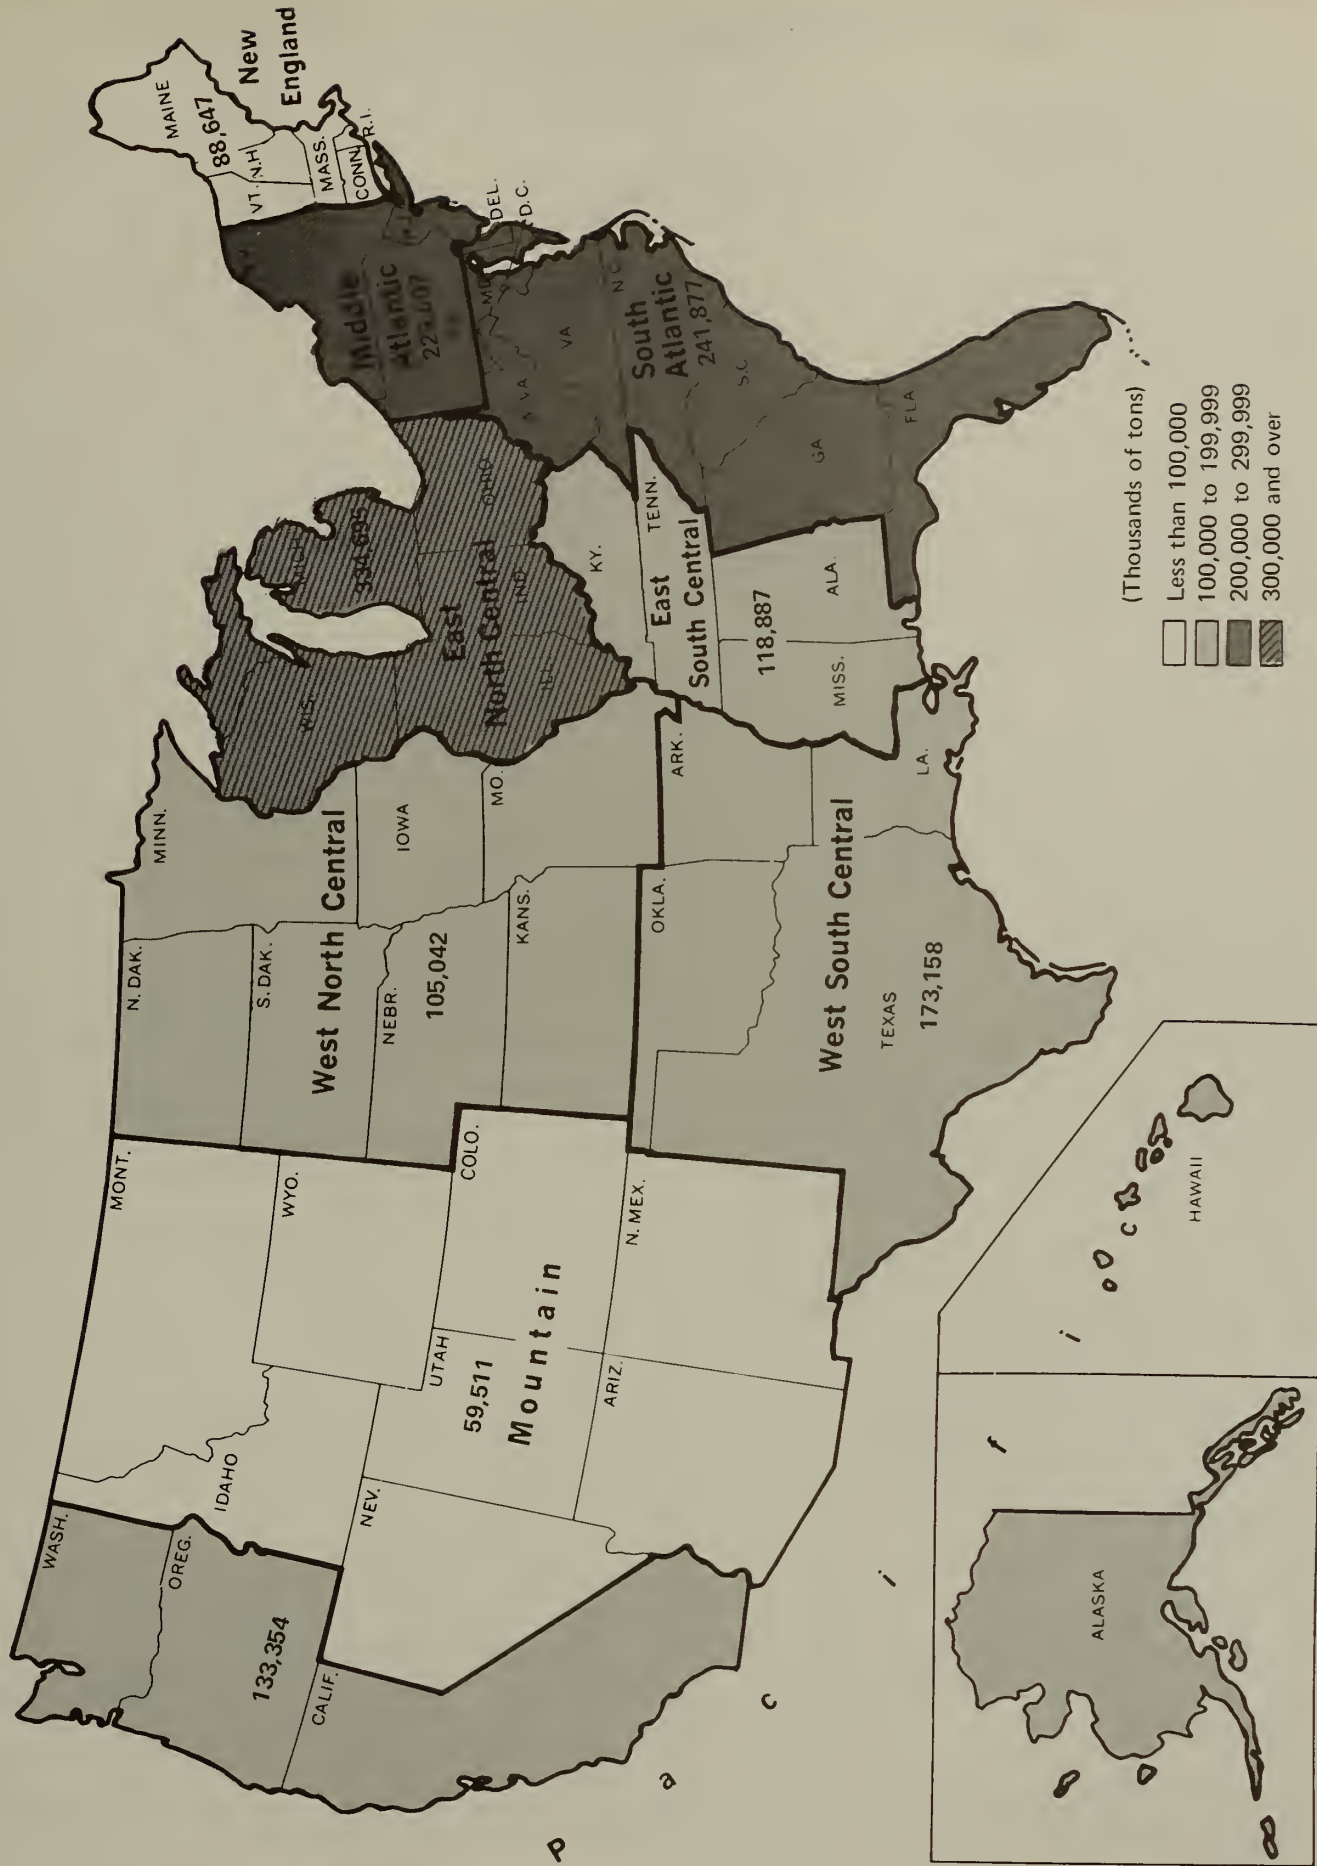

UNITED STATES | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

UNITED STATES

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.
